Public research and private knowledge – science in times of diverse research funding Jon Leefmann, Julia Böttcher, Michael Jungert, Christoph J. Merdes, Sebastian Schuol, 2023-02-28 **The Information Web** Carol C Gould, 2019-07-11 This book deals with the major ethical and social implications of computer networking and its technological development In this book a number of leading thinkers philosophers computer scientists and researchers address some fundamental questions posed by the new technology **Online Education** Anthony G. Picciano, 2018-07-17 Online Education is a comprehensive exploration of blended and fully online teaching platforms addressing history theory research planning and practice As colleges universities and schools around the world adopt large scale technologies and traditional class models shift into seamless digitally interactive environments critical insights are needed into the implications for administration and pedagogy Written by a major contributor to the field this book contextualizes online education in the past and present before analyzing its fundamental changes to instruction program integration social interaction content construction networked media policy and more A provocative concluding chapter speculates on the future of education as the sector becomes increasingly dependent on learning technologies **Online Education Policy and Practice** Anthony G. Picciano, 2016-09-13 Online Education Policy and Practice examines the past present and future of networked learning environments and the changing role of faculty within them As digital technologies in higher education increasingly enable blended classrooms collaborative assignments and wider student access an understanding of the creation and ongoing developments of these platforms is needed more than ever By investigating the history of online education the rise and critique of MOOCs the mainstreaming of social media mobile devices gaming in instruction and more this expansive book outlines a variety of potential scenarios likely to become realities in higher education over the next decade Peer review in scientific publications Great Britain: Parliament: House of Commons: Science and Technology Committee, 2011-07-28 This report indicates that the oversight of research integrity in the UK is unsatisfactory The Science and Technology Committee concludes that in order to allow others to repeat and build on experiments researchers should aim for the gold standard of making their data fully disclosed and made publicly available The report examines the current peer review system as used in scientific publications and the related issues of research impact data management publication ethics and research integrity The UK does not seem to have an oversight body for research integrity covering advice and assurance functions across all disciplines and the Committee recommends the creation of an external regulator It also says all UK research institutions should have a specific member of staff leading on research integrity The report highlights concerns about the use of journal Impact Factor as a proxy measure for the quality of research or of individual articles Innovative ways to improve current pre publication peer review practices are highlighted in the report including the use of pre print servers open peer review increased transparency and online repository style journals The growth of post

publication peer review and commentary also represents an enormous opportunity for experimentation with new media and social networking tools which the Committee encourages There should also be greater recognition of the work sometimes considered to be a burden carried out by reviewers by both publishers and employers In order to do this publishers need to have in place systems for recording and acknowledging the contribution of those involved in peer review

Handbook Of Mathematical Science Communication Anna Maria Hartkopf, Erin Henning, 2022-12-28 Mathematical science communication as well as the field of science communication in general has gained momentum over the last few decades Mathematical science communication aims to inform the public about contemporary research enhance factual and methodological knowledge and foster a greater interest and support for the science of mathematics This enables the public to apply it to their practical life and to decision making on a greater scale These objectives are met in the various formats and media through which mathematical science communication is brought to the public The first 13 chapters of the book consist of best practice examples from the areas of informal math education museums and exhibitions and the arts The final 5 chapters discuss the structural aspects of mathematical science communication and contribute to the basis for its theoretical framework

Archeologia e Calcolatori, 34.2, 2023, 2024-02-06 Il numero 34.2 2023 di *Archeologia e Calcolatori* dedicato alla memoria di Lea Frosioni Ariani una delle protagoniste della nascita e dello sviluppo editoriale della rivista in seno alle Edizioni All Insegna del Giglio Il volume si apre con un testo focalizzato sull'applicazione di tecniche di Machine Learning proprio sugli articoli di *Archeologia e Calcolatori* pubblicati tra il 2011 e il 2020 al fine di valorizzare il contributo dell'archeologia computazionale nel più ampio dominio interdisciplinare dell'Heritage Science nonché di evidenziare

il ruolo euristico e predittivo delle diverse tecniche di Intelligenza Artificiale per ottenere un accesso diversificato all'analisi e all'interpretazione dei dati. Il numero ricco di contributi che affrontano l'applicazione di sempre più sofisticate tecnologie di analisi e gestione dei dati nella definizione di modelli di sistemi insediativi nell'integrazione di strumenti statistici nella ricostruzione virtuale di contesti e monumenti. Chiude il volume il consueto spazio dedicato alle recensioni con un focus sull'ampio e articolato settore delle Digital Humanities e sull'attuale e delicato dibattito riguardo il limite di utilizzo delle immagini del patrimonio culturale pubblico. *The Intellectual Property and Food Project* Charles Lawson, Jay

Sanderson, 2016-03-03 The relationship between intellectual property and food affects the production and availability of food by regulating dealings in products processes innovations information and data. With increasingly intricate relations between international and domestic law as well as practices and conventions intellectual property and food interact in many different ways. This volume is a timely consideration and assessment of some of the more contentious and complex issues found in this relationship such as genetic technology public research and food security socio economic factors and the root cause of poverty and patent busting. The contributions are from leading scholars in this emerging field and each chapter foregrounds some of the key developments in the area exploring historical doctrinal and theoretical issues in the field while at the same time developing new ideas and perspectives around intellectual property and food. The collection will be a useful resource in leading further discussion and debate about intellectual property law and food. **Science** John Michels (Journalist), 2011
