make your head hurt just thinking about it To help let s examine some of the common beliefs that are out there about one of
our most important body parts Hair dye causes cancer Although hair dye made before 1980 contained chemicals that cause
cancer in animals today s dyes are much safer However modern hair dyes still contain thousands of chemicals so experts
remain unsure whether they cause cancer or not That being said it s better not to dye your hair too often Eating black
sesame seeds can turn gray hair black Many people believe black sesame seeds slow down the signs of aging including gray
hairs That s because they re filled with important vitamins and nutrients Therefore while no scientific studies have proven
that black sesame seeds help keep your hair looking young they are still very healthy As for the best way to avoid gray hairs
stay away from stress smoking and poor diet as these have all been shown to cause gray hair There s more to your head than
the hair on it Let s take a look at some other beliefs that you may have heard before Eating very cold foods will give you a
headache Also called brain freeze this can happen when you quickly eat something very cold like ice cream This is because
when the cold food touches the top of your mouth or throat it increases blood flow to certain areas of your head which causes
a temporary headache So to enjoy headache free ice cream stick to licking it Cutting a baby s eyelashes can make them grow
longer Long thick eyelashes on a baby are so cute that some parents may risk hurting their children by cutting their baby s
eyelashes to help them grow longer However this claim has no scientific basis The factors that influence eyelash growth are
nutrition and genetics But what can mothers do to help their babies grow long beautiful lashes It s simple just make sure the
baby is receiving proper nutrition Now you know the truth behind these common head health claims Don t let this knowledge
