The Returned Claudia Masferrer, Erin R. Hamilton, Nicole Denier, 2024-03-21 In the first two decades of the 21st century more than two million Mexican migrants returned to Mexico from the United States Between 2010 and 2020 the number of people who returned to Mexico was so large that for the first time in at least fifty years more people entered Mexico from the United States than entered the United States from Mexico Many of these migrants were destined for urban areas and we know little about how they fare after they return to cities In *The Returned* sociologists Claudia Masferrer Erin R. Hamilton and Nicole Denier examine the experiences of returned migrants in Mexico City one of the largest metropolitan areas in the world Masferrer Hamilton and Denier draw on interviews with former U.S. migrants living in Mexico City to better understand the experience of return migration to urban areas Each of the migrants they spoke with lived in the United States for long periods with noncitizen status during the last four decades During this time U.S.

immigration policy became increasingly focused on restriction and enforcement which made it difficult for migrants to safely move back and forth across the border for work or to visit family without documentation. The authors find that upon their return migrants in Mexico City felt disoriented and lost and had difficulty adapting to a massive urban environment where there is little support for returnees. They struggled to translate their work experience from their time in the U S to find quality jobs. Additionally many found their family lives upended as they reunited with or formed families in the U S. Some found themselves separated from family members still in the U S with no ability to legally visit them. Others brought their families back to Mexico some of whom were U S citizens and had never been to Mexico before. They too struggled to adapt and integrate to life in Mexico City. The authors use the experiences of return migrants to discuss policies and practices that would improve their lives and ease their reintegration. To help with the disorientation they experience returnees proposed ongoing psychological support with mental health professionals who have knowledge and training in the social and legal issues that return migrants face. Return migrants also advocated for policies to enhance skill matching job creation and entrepreneurship as many felt the occupational skills they developed in the U S were undervalued in Mexico. To address family separation returnees argued for legal and policy reform to accommodate family reunification. The Returned is an illuminating account of the difficulties faced by return migrants and their families in Mexico City GATE Sociology Latest Book II Solved Previous Year Paper II 2021 to 2025 II With 1500 Chapter Wise MCQ II 2 in 1 Book II PYQ + MCQ II With Detail Solution II As Per Exam Pattern DIWAKAR EDUCATION HUB, 2025-07-10 Key Features Solved PYQs 2021 2025 In depth step by step solutions with conceptual clarity 1500 Chapter Wise MCQs Targeted questions for each topic to build and test your understanding Updated as per Latest Syllabus Fully aligned with the current GATE Sociology curriculum and exam pattern Detailed Explanations Each question includes thorough explanations to enhance learning and retention Perfect for Self Study Easy to understand language logical flow and exam oriented content Building a Sustainable Lean Culture Tina Agustiady, Elizabeth A. Kuhn, Thorsten Immel, 2025-01-21 Anchors are everyday items in construction However the ever more complex world of building has led to anchor technology being investigated in more and more scientific detail during the course of product development New anchor systems take into account the increasing diversity of base materials and the required economic efficiency The scientific studies result in sometimes highly complex engineering design methods that are specified in numerous codes of practice e g EN 1992 4 Eurocode 2 Design of concrete structures Part 4 Design of fastenings for use in concrete As a result it is no longer possible to design an anchor with a simple quick and easily grasped manual calculation However the experience of the authors over the past 20 years shows that in order to gain the acceptance of users there is an urgent need to translate academic anchor theory into manageable anchor practice for real building sites It is exactly that gap that this book intends to fill The focus is on the practical use of anchors and answering practical questions such as Which anchor do I need for my fastening task and what do I have to consider To answer this question the authors guide the reader through the seemingly vast number of anchor systems and provide advice for everyday building situations The theory regarding the structural behaviour is only explained and then only briefly when it helps to solve the fastening task and understand the solution to that task For clarity the reader is merely referred to the existing codes of practice and other specialist publications that provide summaries All authors have been working for many years with a focus on anchors and fastenings some of them in anchor testing laboratory or as trainers They are members of various working groups and
