The Best of the Best Rubén A. Gaztambide-Fernández, 2010-01-30 For two years Rubén Gaztambide Fernández shared the life of what he calls the Weston School an elite New England boarding school Vividly describing the pastoral landscape and graceful buildings the rich variety of classes and activities and the official and unofficial rules that define the school *The Best of the Best* reveals a small world of deeply ambitious intensely pressured students For Gaztambide Fernández Weston is daunting yet strikingly bucolic inspiring but frustratingly incurious and sometimes especially for young women a gilded cage for a gilded age Quality of Life Improvement: Smart Approaches for the Working and Aging Populations Sabina

Baraković, Zahid Akhtar, Jasmina Barakovic Husic, 2024-03-19 Quality of life QoL is a broad concept that has many definitions and meanings depending on the context under consideration It can be perceived as the overall enjoyment of life and a multidimensional concept which emphasizes the self-perceptions of an individual's current state of mind which is affected in a complex way by the person's physical health psychological state personal beliefs social relationships and their relationship to salient features of their environment On the other hand demographic data suggests an increased need for workers worldwide and a rapid aging trend in the active workforce as well as in general This trend of workforce deficit and population aging will be even more prominent in the future Therefore in order to have and sustain a healthy motivated and productive workforce but also healthy independent and active elderly adults one must improve their QoL and vice versa Improving QoL will improve general public health and in turn create communities who can contribute in diverse and positive ways to both promote and sustain health for future generations Kiplinger's Personal Finance, 2007-01 The most trustworthy source of

information available today on savings and investments taxes money management home ownership and many other personal finance topics **Gerontechnologies for Home Support** Alexander Moreno, Sumi Helal, Henk Herman Nap, Gloria M. Gutman, 2024-10-07 In recent years various digital and non-digital gerontechnology applications in home support have been developed From medication administration aids e.g. reminders and alarms to environmental monitoring e.g. air quality sensors and cameras to fall detection and health and activity monitoring e.g. smartwatch these promising solutions are in the works or already in the marketplace Additionally the COVID-19 pandemic has accelerated the development and deployment of technological solutions supporting remote care and communication e.g. video calls and home service delivery e.g. meals and groceries both of which have been developed to facilitate aging in place This is significant especially as avoiding the institutionalization of older adults has become a major goal of governments and caring families around the world These technologies are a potential solution to help older adults and family caregivers age at home maintain autonomy and independence and avoid social isolation These technologies can reduce the workload of professional caregivers It is crucial to update our knowledge on evidence-based technologies for home support tested simultaneously in older adults and their family caregivers Healthcare professionals and families are often disadvantaged by a lack of information demonstrating their

utility and cost effectiveness This article collection focuses on providing evidence based information about emerging and existing gerontechnologies which is essential to make an informed decision in recommending their use or deciding to purchase them For older adults it will provide proofs upon which to make an informed decision to invest in a specific technology when needed For family caregivers it will improve their judgment when trying to choose purchase and adopt a technology aiming to solve a problem at home and have peace of mind when these technologies are used to support their loved ones For clinicians it will provide a pool of evidence based technological tools that could be recommended to families facing the loss of autonomy and independence of older adults For researchers and scholars it will provide a base of knowledge for future applied research in gerontechnology Finally improving the evidence in gerontechnology will help to provide cues for policymakers and governments to create legislation aiming to protect the public and the end users of these technologies

People's Republic of China International Monetary,International Monetary Fund. Asia and Pacific Dept,2023-02-03 Following an impressive recovery from the initial impact of the pandemic China s growth has slowed significantly in 2022 It remains under pressure as more transmissible variants have led to recurring outbreaks that have dampened mobility the real estate crisis remains unresolved and global demand has slowed Macroeconomic policies have

been eased appropriately but their effectiveness has been diminished by a focus on enterprises and increasingly less effective traditional infrastructure investment rather than support to households The pandemic and its impacts have also been a setback to economic rebalancing toward private consumption and to reducing greenhouse gas emissions A slowdown in growth enhancing reforms against the backdrop of increasing geoeconomic fragmentation pressures stand in the way of a much needed lift to productivity growth weighing on China's medium term growth potential
