Breaking Away Maurice E. Stucke, 2022 Breaking Away sounds a warning call alerting readers that their privacy and autonomy concerns are indeed warranted and the remedies deserve far greater attention than they have received from our leading policymakers and experts to date Through the various prisms of economic theory market data policy and law the book offers a clear and accessible insight into how a few powerful firms Google Apple Facebook Meta and Amazon have used the same anticompetitive playbook and manipulated the current legal regime for their gain at our collective expense While much has been written about these four companies power far less has been said about addressing their risks In looking at the proposals to date however policymakers and scholars have not fully addressed three fundamental issues First will more competition necessarily promote our privacy and well being Second who owns the personal data and is that even the right question Third what are the policy implications if personal data is non rivalrous Breaking Away not only articulates the limitations of the current enforcement and regulatory approach but offers concrete proposals to promote competition without having to sacrifice our privacy This book explores how these platforms accumulated their power why the risks they pose are far greater than previously believed and why the tools need to be far more robust than what is being proposed Policymakers scholars

and business owners managers and entrepreneurs seeking to compete and innovate in the digital platform economy will find the book an invaluable source of information

Startup Finance 2.0 Sam Ghosh, 2025-08-29 Traditional corporate financial theories and tools are based on matured companies with the assumption that the companies are going concerns Going Concern refers to the assumption that a company will continue to operate indefinitely with no intention or necessity of liquidation or cessation of operations in the foreseeable future The problem is that the Going Concern assumption does not hold for startups due to the inherent uncertainty associated with startups Traditional financial education and resources usually meant for analysts and accountants aren't ideal for entrepreneurs They focus on analyzing past data from established businesses not on making forward looking decisions in the uncertain and highly dynamic environment of startups Entrepreneurs also often struggle to prioritize the allocation of resources between seemingly urgent matters and matters that are important for the long term value of the startup Thus this book takes a value oriented approach to startup finance The book is designed to build the financial intuition that an entrepreneur needs to prioritize matters vital for the long term value of the company raise capital and allocate capital for value maximization It also looks at finance from a value creation point of view and covers specific methods especially suited for startups from investment assessment to valuation to fundraising to managing day to day finances

What You Don't Know Cortnie Abercrombie, 2022-03-22 You are probably not aware because of their hidden nature but Artificial Intelligence systems are all around you affecting some of the biggest areas of your life jobs loans kids mental health relationships freedoms and even healthcare decisions that can determine if you live or die As an executive working in AI at one of the largest most sophisticated tech companies on the planet Cortnie Abercrombie saw firsthand how the corporate executives and data science teams of the Fortune 500 think about and develop AI systems This gave her a unique perspective that would result in a calling to leave her job so she could reveal to the public the sobering realities behind AI without any constraints or Public Relations candy coating from corporate America In this book she makes it easy to understand how AI works and unveils what companies are doing with AI that can impact you the most Most importantly she offers practical advice on what you can do about it today and the change you should demand for the future This book drops the hype over exaggerations and big scientific terms and addresses the pressing questions that non insiders want answered How does AI work in words you don't need a PhD to understand How can AI affect my job replace me or prevent my hire Is AI involved in life or death decisions in healthcare Could my digital accounts or home network be hacked because of my AI based Smart TV coffeemaker or robot vacuum How does AI know so much about me what does it know and can it be used against me Can it manipulate people to do things they wouldn't normally Could AI help push my teen to self harm or suicide Is fake news a real thing How can AI affect my rights and liberties Does facial recognition play a part What can I do to protect myself my kids and my grandkids What should I demand from educators lawmakers and corporations to ensure AI is used in ways that are safe fair and responsible Is AI worth having What could AI

do for us in the future It s time to understand what this AI hubbub is all about and what you re going to do about it because what you don t know about AI could hurt you The Sales Multiplier Formula Shawn Casemore,2024-12-30 What do companies such as Northwestern Mutual Life Hilton and Nokia have in common They approach selling differently than any of their competitors Sales is not a transaction executed by the sales department it s a process that all employees support The result The sale value for each new customer is most often double triple or even quadruple what their closest competitors achieve This book dives deeply into the exact formula for how you can achieve similar if not even greater results Consider this your guide to shifting your organization from transactional selling to embracing a sales method that will explode your sales revenue and engage your entire organization in doing so The reason for embracing this method extends beyond achieving explosive sales growth The author has coached thousands of sales professionals over the years and one challenge they face stands out more than any other It s that selling is becoming increasingly difficult Why do you think there are over one million sales related vacancies in the United States at this very moment according to the US Bureau of Labor Statistics Prospects are more challenging to reach than ever work from home schedules anti spam legislation and policies that restrict visitors are making it increasingly difficult for your sales team to do what you want them to do sell Worse yet when they do make a sale it s as if they are burdening the rest of the organization Complaints about unachievable delivery dates unacceptable terms or insufficient profit all result in a clear divide between sales and everyone else The result A slow erosion of your sales and an increased likelihood that your sales team will soon be searching for a different career It s been this way for a while now and it will continue to be unless you adopt what the author shares in this book iPhone Secrets Darren Murph,2012-11-13 A top tech blogger takes you behind the scenes for an in depth look at the iPhone The world s love of the iPhone only continues to grow by leaps and bounds Darren Murph managing editor of Engadget and a Guinness World Record holder as the most prolific blogger explores every amazing capability of the iPhone and shows you how to take full advantage of this remarkable mini computer He reveals secret shortcuts best ways to boost your productivity how to take advantage of iMessage and push notifications international iPhone travel tips how to maximize AirPlay and so much more Most iPhone users barely scratch the surface of what the device can do the world s leading tech blogger shares little known secrets that let you take your iPhone use to a new level Covers keeping the iPhone synced via iCloud using mobile social networking and location based platforms multitasking iMessage making the most of Siri and using all the video calling options Helps you maximize wireless convenience with AirPlay streaming media Wi Fi calling solutions for international travel and the GameCenter Looks at troubleshooting and jailbreaking for peak performance Perfect for any gadget freak even those with their first iPhone iPhone Secrets opens up a new dimension of productivity convenience and fun for iPhone users

Critical Infrastructure Protection in Homeland Security Ted G. Lewis, 2019-12-17 Covers critical infrastructure protection providing a rigorous treatment of risk resilience complex adaptive systems and sector dependence Wide in scope this classroom tested book is the only one to emphasize a scientific approach to protecting the key infrastructures components of a nation It analyzes the complex network of entities that make up a nation s infrastructure and identifies vulnerabilities and risks in various sectors by combining network science complexity theory risk analysis and modeling and simulation This approach reduces the complex problem of protecting water supplies energy pipelines telecommunication stations power grid and Internet and Web networks to a much simpler problem of protecting a few critical nodes The new third edition of Critical Infrastructure Protection in Homeland Security Defending a Networked Nation incorporates a broader selection of ideas and sectors than the previous book Divided into three sections the first part looks at the historical origins of homeland security and critical

infrastructure and emphasizes current policy The second examines theory and foundations highlighting risk and resilience in the context of complexity theory network science and the prevailing theories of catastrophe The last part covers the individual sectors including communications internet cyber threats information technology social networks SCADA water and water treatment energy and more Covers theories of catastrophes details of how sectors work and how to deal with the problem of critical infrastructure protection s enormity and complexity Places great emphasis on computer security and whole community response Includes PowerPoint slides for use by lecturers as well as an instructor s guide with answers to exercises Offers five robust appendices that augment the non mathematical chapters with more rigorous explanations and mathematics Critical Infrastructure Protection in Homeland Security Third Edition is an important book for upper division undergraduates and first year graduate students in political science history public administration and computer technology It will also be of great interest to professional security experts and policymakers *Program Peace* Jared Edward

Reser,2022-03-05 Did you know the most dominant apes and monkeys are usually the kindest They share the most food groom others more often break up fights are slow to anger and breathe in a relaxed manner Those on the bottom of the social hierarchy are the opposite They are stingy combative irritable anxious depressed and they breathe shallowly It is not easy for a submissive primate to become dominant They have mindsets mannerisms and muscle tension that keep them from escaping their subordinate social strategy and the chronic stress it produces All of this generalizes to people If you want to be free of negative emotion you need to rehabilitate physical trauma in your breath eyes face voice heart gut spine and brain Program Peace will coach you to do precisely this by first retraining your breathing pattern and then walking you through dozens of innovative and effective self care exercises After creating new mindsets and mannerisms and learning to reinvigorate muscles you never knew you had you will find yourself more confident healthier kinder and reprogrammed for peace
