What We Think About When We Try Not To Think About Global Warming Per Espen Stoknes,2015-04-03 Why does knowing more mean believing and doing less A prescription for change The more facts that pile up about global warming the greater the resistance to them grows making it harder to enact measures to reduce greenhouse gas emissions and prepare communities for the inevitable change ahead It is a catch 22 that starts says psychologist and economist Per Espen Stoknes from an inadequate understanding of the way most humans think act and live in the world around them With dozens of examples from the private sector to government agencies Stoknes shows how to retell the story of climate change and at the same time create positive meaningful actions that can be supported even by deniers In What We Think About When We Try Not To Think About Global Warming Stoknes not only masterfully identifies the five main psychological barriers to climate action but addresses them with five strategies for how to talk about global warming in a way that creates action and solutions not further inaction and despair These strategies work with rather than against human nature They are social positive and simple making climate friendly behaviors easy and convenient They are also story based to help add meaning and create community and include the use of signals or indicators to gauge feedback and be constantly responsive Whether you are working on the front lines of the climate issue immersed in the science trying to make policy or educate the public or just an average person trying to make sense of the cognitive dissonance or grapple with frustration over this looming issue What We Think About When We Try Not To Think About Global Warming moves beyond the psychological barriers that block progress and opens new doorways to social and personal transformation

Cultural Sensitivity, Cross-Border Logistics, and E-Commerce in Global Marketing Tarnanidis, Theodore,Vlachopoulou, Maro,2025-04-17 In the digital age global marketing management plays a crucial role in navigating the complexities of a highly interconnected and rapidly evolving world Companies must balance technological advancements with cultural sensitivity adapting their strategies to meet the unique legal economic and social conditions of each market The

rise of strategic partnerships and global alliances highlights the importance of collaboration in addressing these challenges. By embracing innovative approaches, businesses can create effective marketing programs that resonate with diverse audiences, fostering growth and competitiveness on a global scale. **Cultural Sensitivity, Cross Border Logistics, and E Commerce in Global Marketing** examines the ongoing trends in global marketing management strategies within the digital domain. It identifies and analyzes the key challenges of marketing and management transformation in the digital age, particularly in diverse cultural and cross-cultural business contexts and their influence on both domestic and international marketing strategies. Covering topics such as artificial intelligence, AI entrepreneurship, and sustainable consumption, this book is an excellent resource for academicians, researchers, students, consultants, technology developers, policymakers, and more.

Global Meets Digital Vinod Jain, 2023-06-02. The world today is at the intersection of two megatrends: Globalization and Digitalization, a business revolution unfolding in real time. **Global Meets Digital** captures the many nuances of this revolution succinctly, including its impact on our lives and business. An immediate implication of this revolution is that the economic principles that underpinned business and strategy for hundreds of years, such as diminishing returns to scale and resource scarcity, are no longer valid for a large and growing number of products and services. The book will challenge you to think differently, not just about digital products but also about physical products. In the global digital world, products are of three kinds: physical, digital, and smart machines (products that are both physical and digital and connected to the internet), a distinction missed by most books on strategy and global business. The economics of each kind of products is distinct from that of the others, which has strategic implications for all kinds of businesses, implications such as how to compete and how to create and capture value. With several mini case studies and over 100 company examples, the book covers themes and cutting edge issues like the paradox of globalization, digital disruption, disruptive business models, exponential technologies, Internet of Things, competition in digital markets, winner take all market dynamics, Industry 4.0, how to innovate, strategizing for the New Normal, and value creation and value capture in both B2C and B2B contexts. The book derives its underpinnings from the practice of global and digital business, while theory remains in the background. Intended specifically for an executive professional audience, **Global Meets Digital** should also be of value to business students and professors learning to dip their toes into a digital world. Vinod Jain is an expert in global and digital strategy, award-winning professor, Fulbright Scholar, and author of an MBA textbook, **Global Strategy**. He taught at the Rutgers Business School, Newark and New Brunswick, and the Robert H. Smith School of Business, University of Maryland, College Park. At Maryland, he was also the Founding Director of the federally funded Center for International Business Education and Research and Academic Director of Smith School's Executive MBA program in China. Since leaving Maryland, he has taught in China, Denmark, Finland, Poland, and India as a visiting or term professor. His opinion pieces have appeared in *The Washington Post*, *The Baltimore Sun*, *Mensa Bulletin*, and *Economic Times* and *Mint*, India's 1 and 2 business dailies, among other media. In the

past he worked as a middle and senior level executive with American and British multinationals Vinod has a PhD in Strategy and International Business from the University of Maryland College Park MS in Management from UCLA and MS and BS Hons in Statistics from the Indian Statistical Institute Calcutta *Maximizing Saving* Martha M.
