Shrestha, 2020-09-11 This book explores the application of an innovative assessment approach known as Dynamic Assessment DA to academic writing assessment as developed within the Vygotskian sociocultural theory of learning DA blends instruction with assessment by targeting and further developing students Zone of Proximal Development ZPD The book presents the application of DA to assessing academic writing by developing a set of DA procedures for academic writing teachers It further demonstrates the application of Hallidayan Systemic Functional Linguistics SFL combined with DA to

track undergraduate business management students academic writing and conceptual development in distance education This work extends previous DA studies in three key ways i it explicitly focuses on the construction of a macrogenre whole text as opposed to investigations of decontextualized language fragments ii it offers the first in depth application of the powerful SFL tool to analyse students academic writing to track their academic writing trajectory in DA research and iii it identifies a range of mediational strategies and consequently expands Poehner s 2005 framework of mediation typologies Dynamic Assessment of Students Academic Writing will be of great value to academic writing researchers and teachers language assessment researchers and postgraduate students interested in academic writing alternative assessment and formative feedback in higher education

Monetizing Innovation Madhavan Ramanujam, Georg Tacke, 2016-05-02 Surprising rules for successful monetization Innovation is the most important driver of growth Today more than ever companies need to innovate to survive But successful innovation measured in dollars and cents is a very hard target to hit Companies obsess over being creative and innovative and spend significant time and expense in designing and building products yet struggle to monetize them 72% of innovations fail to meet their financial targets or fail entirely Many companies have come to accept that a high failure rate and the billions of dollars lost annually is just the cost of doing business Monetizing Innovations argues that this is tragic wasteful and wrong Radically improving the odds that your innovation will succeed is just a matter of removing the guesswork That happens when you put customer demand and willingness to pay in the driver seat when you design the product around the price It s a new paradigm and that opens the door to true game change You can stop hoping to monetize and start knowing that you will The authors at Simon Kucher know what they re talking about As the world s premier pricing and monetization consulting services company with 800 professionals in 30 cities around the globe they have helped clients ranging from massive pharmaceuticals to fast growing startups find success In Monetizing Innovation they distil the lessons of thirty years and over 10 000 projects into a practical nine step approach Whether you are a CEO executive leadership or part of the team responsible for innovation and new product development this book is for you with special sections and checklist driven summaries to make monetizing innovation part of your company s DNA Illustrative case studies show how some of the world s best innovative companies like LinkedIn Uber Porsche Optimizely Draeger Swarovski and big pharmaceutical companies have used principles outlined in this book A direct challenge to the status quo spray and pray style of innovation Monetizing Innovation presents a practical approach that can be adopted by any organization in any industry Most monetizing innovation failure point home Now more than ever companies must rethink the practices that have lost countless billions of dollars Monetizing Innovation presents a new way forward and a clear promise Go from hope to certainty

Digital Health Eric D. Perakslis, Martin Stanley, 2021. Digital health represents the fastest growing sector of healthcare. From internet connected wearable sensors to diagnostics tests and disease treatments it is often touted as the revolution set to solve the imperfections in healthcare delivery worldwide. While the health value of digital health technology includes greater convenience more personalized treatments and more accurate data capture of fitness and wellness these devices also carry the concurrent risks of technological crime and abuses pervasive to cyber space. Even today the medical world has been slow to respond to these emerging risks despite the growing permanence of digital health technology within daily medical practice. With over 30 years of joint experience across the medical and cybersecurity industries Eric D Perakslis and Martin Stanley provide in this volume the first reference framework for the benefits and risks of digital health technologies in practice. Drawing on expert interviews original research and personal storytelling they explore the theory science and mathematics behind the benefits risks and values of emerging digital technologies in healthcare. Moving from an overview of biomedical product regulation and the evolution of digital technologies in healthcare Perakslis and Stanley propose from their research a set of ten categories of digital side effects or toxicities that must be managed for digital health technology to realize its promise. These ten toxicities consist of adversary driven threats to privacy such as physical security cybersecurity medical misinformation and charlatanism and non adversary driven threats such as deregulation cyberchondria over diagnosis over treatment user error and financial toxicity. By arming readers with the knowledge to mitigate digital health harms Digital Health empowers health practitioners patients and technology providers to move beyond fear of the unknown and embrace the full potential of digital health technology paving the way for more conscientious digital technology use of the future.
