Comparative Educational Studies ,1995 *Explaining Individual Differences in Reading* Susan A. Brady,David Braze,Carol A. Fowler,2011-05-09 Research into reading development and reading disabilities has been dominated by phonologically guided theories for several decades In this volume the authors of 11 chapters report on a wide array of current research topics examining the scope limits and implications of a phonological theory The chapters are organized in four sections The first concerns the nature of the relations between script and speech that make reading possible considering how different theories of phonology may illuminate the implication of these relations for reading development and skill The second set of chapters focuses on phonological factors in reading acquisition that pertain to early language development effects of dialect the role of instruction and orthographic learning The third section identifies factors beyond the phonological that may influence success in learning to read by examining cognitive limitations that are sometimes co morbid with reading disabilities contrasting the profiles of specific language impairment and dyslexia and considering the impact of particular languages and orthographies on language acquisition Finally in the fourth section behavioral genetic and neurological methods are used to further develop explanations of reading differences and early literacy development The volume is an essential resource for researchers interested in the cognitive foundations of reading and literacy language and communication disorders or psycholinguistics and those working in reading disabilities learning disabilities special education

TEREZINHA NUNES The time that it takes children to learn to read varies greatly between different orthographies as the chapter by Sprenger Charolles clearly shows and so do the difficulties that they encounter in learning about their own orthography Nevertheless most people who have the chance to learn to read do in the end read well enough even though a large number experience some significant difficulties on the way Most of them eventually become reasonably efficient spellers too even though they go on make spelling mistakes at any rate if they are English speakers for the rest of their lives So the majority of humans plainly does have intellectual resources that are needed for reading and writing but it does not always find these resources easy to marshal What are these resources Do any of them have to be acquired Do different orthographies make quite different demands on the intellect Do people differ significantly from each other in the strength and accessibility of these resources If they do are these differences an important factor in determining children's success in learning to read and write These are the main questions that the different chapters in this section on Basic Processes set out to answer **Intensive Reading Interventions for the Elementary Grades** Jeanne Wanzek, Stephanie Al Otaiba, Stephanie Dent Al Otaiba, Kristen L. McMaster, 2019-10-21 Packed with easy to use tools and resources this book presents intensive intervention strategies for K-5 students with severe and persistent reading difficulties Filling a key need the authors describe specific ways to further intensify instruction when students continue to struggle Chapters address all the fundamental components of reading phonological awareness phonics and word recognition reading fluency oral language language and reading comprehension and writing to read The authors discuss the design and implementation of intensive instruction and provide effective teaching techniques and activities Grounded in the principles of data-based individualization the book includes concrete recommendations for determining students' particular needs and monitoring their progress An NCTQ Exemplary Text for Reading Instruction
