New Science of Learning Myint

Swe Khine, Issa M. Saleh, 2010-06-16 The earliest educational software simply transferred print material from the page to the monitor Since then the Internet and other digital media have brought students an ever expanding low cost knowledge base and the opportunity to interact with minds around the globe while running the risk of shortening their attention spans isolating them from interpersonal contact and subjecting them to information overload The New Science of Learning Cognition Computers and Collaboration in Education deftly explores the multiple relationships found among these critical elements in students increasingly complex and multi paced educational experience Starting with instructors insights into the cognitive effects of digital media a diverse range of viewpoints with little consensus this cutting edge resource acknowledges the double edged potential inherent in computer based education and its role in shaping students thinking capabilities Accordingly the emphasis is on strategies that maximize the strengths and compensate for the negative aspects of digital learning including Group cognition as a foundation for learning Metacognitive control of learning and remembering Higher

education course development using open education resources Designing a technology oriented teacher professional development model Supporting student collaboration with digital video tools Teaching and learning through social annotation practices The New Science of Learning Cognition Computers and Collaboration in Education brings emerging challenges and innovative ideas into sharp focus for researchers in educational psychology instructional design education technologies and the learning sciences

Teaching and Researching: Reading William Peter Grabe, Fredricka L. Stoller, 2013-11-26 Teaching and Researching Reading was first written to help language professionals understand the complex nature of reading Now in a thoroughly updated and improved second edition the book expands connections from research on reading to instructional practices and teacher initiated action research Offering an updated overview of reading theory it summarises key ideas and issues in first and second language contexts In addition to providing insightful research analyses Grabe and Stoller offer practical advice for practitioners and researchers including evidence based teaching ideas and a multi step iterative process for conducting meaningful action research on reading related topics The volume outlines 29 projects for teacher adaptation and use as well as numerous new or substantially expanded resource materials that can be used for both action research and classroom instruction Learning aids featured throughout the volume include key concept boxes and a glossary of key terms quote boxes highlighting critical issues in the field resource lists of relevant journals books and websites Fully revised throughout with a range of new exemplary L1 and L2 research studies and an entirely new chapter on the move from research implications to instructional applications this second edition of Teaching and Researching Listening is an invaluable resource for teacher trainers practicing teachers materials writers and researchers alike
