Taxation and the Cost of Capital in Hungary and Poland International Monetary Fund,1990-12-01 This paper compares the effective rates of taxation faced by a representative investor located in a major capital exporting country for investments in machinery and buildings in nine capital importing European countries Poland and Hungary are found to have relatively high effective tax rates on equity financed investment The analysis suggests that both countries would benefit from streamlining capital cost recovery allowances and possibly lowering statutory corporate tax rates as permitted by the revenue constraint rather than providing tax preferences for foreign investors *International Effects of Tax Reforms* International Monetary Fund,1988-07-12 This paper highlights the significance of open economy considerations in the analysis of tax reforms It focuses on domestic and international consequences of revenue neutral conversion between income and value added tax systems The principal result is that the direction of changes in key macroeconomic variables consequent on such tax conversions depends critically on the current account position For example a conversion from an income to a value added tax system lowers the world interest rate if the country adopting the reform runs a surplus in the current account of its balance of payments and vice versa **Consumption Tax Trends 2012 VAT/GST and Excise Rates, Trends and Administration Issues** OECD,2012-11-13 Consumption Tax Trends provides information on Value Added Tax Goods and Services Tax VAT GST and excise duty rates in OECD member countries [Valuation: Measuring and Managing the Value of Companies, 8e DCF Model Download](#) McKinsey & Company Inc.,2025-05-20 The 1 best selling guide to business valuation newly updated and revised Valuation Measuring and Managing the Value of Companies has been the gold standard in measuring and managing company value for more than 30 years Now in its eighth edition this acclaimed volume continues to help corporate executives bankers students and other financial professionals around the world gain a deep understanding of valuation as well as allow their companies to create and maximize economic value Called the best practitioners guide to valuation by The Financial Times and the most influential contemporary books about the world economy by The Economist the newly revised eighth McKinsey's long tradition of excellence In the book a team of veteran McKinsey Company professionals walk you through the foundations of valuation advanced topics like valuing high growth companies and digital assets and managerial topics such as corporate portfolio strategy and acquisitions You'll also discover Clear accessible chapters with detailed guidance on the fundamental principles of value creation Best practices to apply valuation to business strategy questions and communicate with investors How to analyze and forecast performance the cost of capital and put it all together in a coherent valuation McKinsey Company has been helping businesses governments non profit organizations and other institutions grow and thrive for almost 100 years Valuation's authors draw on that storied history to bring you the most relevant accurate intuitive and practical guide to valuation on the market today **International Spillovers of Taxation** International Monetary Fund,1989-05-11 This paper highlights key issues pertinent for the understanding of international

effects of domestic tax policies and of international tax harmonization The analytical framework adopts the saving investment balance approach to the analysis of international economic interdependence focusing on income consumption and international borrowing A simulation model is developed that is richer in structure than the two period analytical model The analytical and simulation frameworks are used to analyze the consequences of revenue neutral conversions between income and consumption VAT tax systems the international effects of budget deficits and public debt management and the effects of international tax harmonization We demonstrate that the effects of such changes in the structure of taxes depend critically on international differences in saving and investment propensities International Vat Harmonization Mr.Steven A. Symansky,Mr.Jacob A. Frenkel,Assaf Razin,1991-02-01 This paper highlights key macroeconomic issues related to VAT harmonization A model is developed which emphasizes the effects of changes in the time profile of various taxes on international behavior Dynamic simulations reveal that the macroeconomic and welfare implications of VAT harmonization including conflicts of interest depend critically on the tax system and the degree of substitution governing temporal and intertemporal allocations We also demonstrate that the effects of revenue neutral tax conversions between income and consumption tax systems undertaken by a single country depend critically on international differences in behavior

Interest Rates in Financial Analysis and Valuation , **Tax Credits for Debt Reduction** International Monetary Fund,1989-08-21 The incentives for domestic investment in debtor countries are influenced by the terms of their external obligations and by the system of taxation utilized to provide government revenue for debt payments It is well known that existing debt contracts could be altered to improve the incentives for investment but this has proven difficult to accomplish perhaps because individual creditors have incentives not to agree to such changes In this paper we show that a simple tax credit scheme that can be implemented unilaterally by the debtor government can overcome at least some of the inefficiencies caused by existing debt contracts **Wind Power** Paul Gipe,2004 Wind energy today is a booming worldwide industry The technology has truly come of age with better more reliable machinery and a greater understanding of how and where wind power makes sense from the independent homestead to a grid connected utility wide perspective Heightened concerns about our environment mean that this resurgence of interest in wind a natural and widespread power source is here to stay Wind Power is the completely revised and expanded edition of Paul Gipes definitive 1993 book Wind Power for Home and Business In addition to expanded sections on gauging wind resources and siting wind turbines this edition includes new examples and case studies of successful wind systems international sources for new and used equipment and hundreds of color photographs and illustrations **Tax Policy and Reform for Foreign Direct Investment in Developing Countries** International Monetary Fund,1990-07-01 This paper identifies tax factors in 21 developing countries that have an impact on foreign direct investment flows It categorizes those factors into issues associated with tax coordination tax rates and rate structures and composition of the tax base Recent actions by countries reveal no clear pattern

in their attempts to increase tax coordination while many have reduced corporate tax rates and stream lined tax incentives However broad based tax reform is lacking in most leaving room for further possibilities in tax reform for attracting foreign investment The paper also addresses nontax factors that can be instrumental in attracting foreign investment **AARP J.K. States International Monetary Fund, 1989-12-13 This paper reviews the literature on the revenue implications of a lower capital gains tax rate in the United States The existing empirical research indicates that the timing of realizations is sensitive to tax changes but is inconclusive on the long run revenue implications No study claims that tax revenues would increase very much on a permanent basis The paper concludes that other aspects of a lower capital gains tax rate deserves more attention in particular its impact on resource allocation and tax arbitrage

9th Circuit Update , 1990 **Debt-Equity Composition of International Investment** International Monetary Fund, 1988-01-01 Capital flows to the nonindustrial countries share three striking characteristics First the bulk of these flows was in the form of debt not equity second the loans were mostly to or guaranteed by debtor governments and third these debts were largely bank loans not bonds This paper examines the economic factors that may have been responsible

Voluntary Debt Reduction International Monetary Fund, 1988-09-06 In an economy with a debt overhang investment depends on expected tax rates On the other hand expected tax rates depend on the debt's face value Therefore investment depends on the face value of debt I show that this may lead to a positive or negative association between debt and investment depending on the degree of international capital mobility and attitudes toward risk There may also exist multiple equilibria with high and low investment levels The paper explores the desirability of debt reduction in this environment First it characterizes circumstances in which debt reduction is desirable from the collective point of view of the creditors Second it formulates the forgiveness decision as a noncooperative game among creditors and explores the scope for debt reduction as an outcome of this game

The Implications of Fiscal Conditions and Growing Internationalization for Monetary Policies and Financial Market Conditions International Monetary Fund, 1988-06-29 The paper argues that the endogenous behavior of monetary authorities provides an important channel through which fiscal policy influences financial variables and that growing internationalization has increased the sensitivity of financial conditions to fiscal policy The core of the argument is that fiscal policy influences exchange rates particularly to the extent that it affects the expected after tax returns on capital located in different countries and that the sensitivity of exchange rates to fiscal policy increases with growing internationalization In addition financial conditions reflect the actual and expected responses of the monetary authorities to exchange rates

The Taxation of Financial Assets Mr. John R. King, Mr. Vito Tanzi, 1995-05-01 Taxes affect the degree and efficiency of financial intermediation in many different ways This paper summarizes the main tax provisions in OECD countries that affect the overall tax wedge between pre tax returns on investments and the post tax yield on the savings that finance them This tax wedge is shown to vary widely in individual countries according to the different ways in which savings are channeled through financial markets The paper then discusses alternative criteria for assessing tax regimes for financial assets and summarizes recent trends in OECD countries
