

Motivating and Retaining Online Students: Research-Based Strategies That Work

DESCRIPTION

COPY LINK: <https://pdf.bookcenterapp.com/slide/1118531701> Finally, the first research-based book of sound strategies and best practices to help instructors motivate students to complete their online courses. Although studies support the effectiveness of learning online, students often fail to complete online courses. Some studies have found that as many as 50% drop out of their online courses or programs. Retention is not only a growing expectation and imperative, but it is also an opportunity for faculty members to take the lead in innovating, researching, and implementing new strategies while demonstrating their effectiveness. Designed for instructors and instructional designers, *Motivating and Retaining Online Students* is filled with empirical research from the authors' study of motivation and retention strategies that can reduce online learner dropout. Focusing on the most important issues instructors face, such as course design, student engagement and motivation and institutional, instructional, and informal student support strategies, the book provides effective online strategies that help minimize student dropout, increase student retention, and support student learning. While helping to improve the overall retention rates for educational institutions, the strategies outlined in the book also allow for student diversity and individual learner differences. Lehman and Conceição's proven model gives instructors an effective approach to help students persist in online courses and succeed as learners.

Developing Engaging Online Courses Thornburg, Amy W.,Abernathy, Dixie F.,Ceglie, Robert J.,2020-01-31 Online instruction is rapidly expanding the way professors think about and plan instruction In addition online instructional practices are expanding and changing as new tools and strategies are adopted It is imperative that programs and institutions of higher education explore increased online options that align with best practices to develop effective and engaging online courses The *Handbook of Research on Developing Engaging Online Courses* is an essential research publication that provides multiple perspectives on improving student engagement and success in online courses This book includes topics focused on the online learner online course content and effective online instruction The content contained within the title is ideal for curriculum developers instructional designers IT consultants deans chairs teachers administrators academicians researchers and students Using ROI for Strategic Planning of Online Education Kathleen S. Ives, Deborah M. Seymour, 2023-07-03

Published in association with While higher education has rarely employed ROI methodology focusing more on balancing its revenue streams such as federal state and local appropriations tuition and endowments with its costs the rapid growth of online education and the history of how it has evolved with its potential for institutional transformation and as a major source of revenue as well as its need for substantial and long term investment makes the use of ROI an imperative This book both demonstrates how ROI is a critical tool for strategic planning and outlines the process for determining ROI The book s expert contributors lay the foundation for developing new practices to meet the compelling challenges of online education and identify new models that offer the potential for transforming the educational system meeting new workforce demands and

ultimately improving the economy The opening chapters of the book explore the dimensions of ROI as a strategic planning process offering guiding principles as well as methods of measurement and progress tracking and demonstrate the impact of ROI across the institution The book identifies the role of previously overlooked constituents such as online professionals as critical partners for developing institutional strategy and institutional stakeholders for vital input on inclusivity diversity and equity and their increasingly important role in impacting the ROI of online programs Subsequent chapters offer a range of approaches to ROI reflecting the strategic priorities and types of return institutions seek from their investment in online programming whether they be increased profits or surpluses via reduced expenses or increased operating efficiencies or the development of increased brand awareness for their programs They also address the growing competitive environment of recent commercial entrants and online program managers OPMs The contributors offer best practices for setting goals and identifying benchmarks for increasing and measuring payback including the creation of cross functional ROI teams from across an institution and further address the advantages and disadvantages of universities partnering with external providers or even other colleges and universities to provide online programs with them and for them This book offers presidents and senior administrators faculty engaged in shared governance online learning administrators and stakeholders representing student community and employer interests with a rigorous process for developing an online strategy ECEL 2022 21st European Conference on e-Learning Panagiotis Fotaris, Andrew Blake, 2022-10-27 *Handbook of Research on Barriers for Teaching 21st-Century Competencies and the Impact of Digitalization* Dhira, Harpreet Kaur, 2021-06-25 The need to develop 21st century competencies has received global recognition but instructional methods have not been reformed to include the teaching of these skills Multiple frameworks include creativity critical thinking communication and collaboration as the foundational competencies Complexities of planning curriculum and delivering instruction to develop the foundational competencies requires professional training However despite training instructional practice can be impacted by barriers caused by personal views of teachers economic constraints access to resources social challenges pandemic overwhelming pace of global shifts and other influences With digitalization entering the field of education it is unclear if technology has helped in removing or eliminating the barriers or has itself become another obstruction in integrating the competencies Gaining an educator's perspective is essential to understanding the barriers as well as solutions to mitigate the impediments through innovative instructional methods being practiced across the globe via digital or non digital platforms The need for original contributions from educators exists in this area of barriers to 21st century education and the role of digitalization The Handbook of Research on Barriers for Teaching 21st Century Competencies and the Impact of Digitalization discusses teaching the 21st century competencies namely critical thinking creativity collaboration and communication This book presents both the problems or gaps causing barriers and brings forth practical solutions digital and non digital to meet the educational shifts The chapters will determine the specific barriers that exist whether political social economic or

technological to integrating competencies and the methods or strategies that can eliminate these barriers through compatible instructional approaches. Additionally, the chapters provide knowledge on the impacts of digitalization in general on teaching and learning and how digital innovations are either beneficial to removing impediments for students or rather causing obstructions in integrating the four competencies. This book is ideally intended for educators and administrators working directly with students, educational researchers, educational software developers, policymakers, teachers, practitioners, and students interested in how 21st century competencies can be taught while facing the impacts of digitalization on education.

Handbook of Research on the Global Empowerment of Educators and Student Learning Through Action Research Slapac, Alina, Balcerzak, Phyllis, O'Brien, Kathryn, 2021-05-07

The year 2020 brought an unprecedented worldwide health crisis through the COVID 19 pandemic that has been affecting all sectors including education. There were questions surrounding the effectiveness of online trainings for teachers, online teaching practices, the motivation and engagement of students, and the quality of learning and education in these times. Action research emerged to address these concerns, being a systematic process of inquiry using reflection within a cyclical model of planning, acting, implementing, evaluating, and continuous reflection. This method of research is employed with the expertise and passion from educators to better enhance online practices and education while using authentic learning and experiences. Using collaboration, social advocacy, and action research, there is the opportunity to advance teaching for students, families, and communities without a physical context involved.

The Handbook of Research on the Global Empowerment of Educators and Student Learning Through Action Research explores successful teaching and learning skills through the method of action research and intersects it with online learning in order to uncover best teaching practices in online platforms. This book showcases educational professionals' action research for solutions in advancing teaching and learning, the practical benefits of action research, recommendations for improving online teaching and learning, and a focus on professional growth as well as social justice advocacy. It highlights important topics including student learning, teacher collaboration, authentic learning, advocacy, and action research in both K-12 and higher education settings. This book is ideal for inservice and preservice teachers, administrators, teacher educators, practitioners, researchers, academicians, and students interested in how action research is improving and advancing knowledge on the best teaching practices for online education.

Herzog, Zuzana Kubincová, Peng Han, Marco Temperini, 2019-11-15 This book constitutes the proceedings of the 18th International Conference on Advances in Web Based Learning ICWL 2019 held in Magdeburg Germany in September 2019 The 15 full 15 short and 7 poster papers presented in this volume were carefully reviewed and selected from 68 submissions The contributions were organized in topical sections named Semantic Web for E Learning Learning Analytics Computer Supported Collaborative Learning Assessment and Pedagogical Issues E learning Platforms and Tools Mobile Learning and Poster Papers **Designing the Online Learning Experience** Simone C. O. Conceição, Les Howles, 2023-07-03 This book provides instructors with a holistic way of thinking about learners learning and online course design The distinctive strategies derived from an integrated framework for designing the online learning experience help create an experience that is more personalized engaging and meaningful for online learners The focus of this book is on the learners and the design of their online learning experiences The authors refer to learning design instead of instructional design which focuses on instruction and places the instructor at the center stage of the process Therefore the focus is on approaching a learner s online course experience as a journey consisting of a combination of learning interactions with content instructor and other learners In most online courses instructors and learners are separated in time and space and depend on technology to facilitate interactions that often lack a strong personal dimension As online learning continues to proliferate and mature the emphasis on simply making content available to students online is no longer acceptable Creating online courses now requires a new way of thinking that incorporates new design ideas and approaches from a variety of fields it also requires a new set of learning design skills for instructors and course designers Organized into eight chapters this volume focuses on enhancing online learning experiences for each of the major aspects of an online course providing evidence based principles and strategies to promote learner engagement and deep learning The concluding chapter provides an example illustrating a real world application of the principles and strategies covered in the book using Design Thinking to create learning experiences This book provides strategies for approaching the learning experience from an integrative perspective for both experienced online instructors and those new to online course design These strategies are based on evidence based learning design principles and encourage the reader to adopt an empathic mindset focused on the experience of the learner **Online**
