One Mind Two Languages Bilingual Language Processing:

One Mind, Two Languages Janet Nicol, 2001-02-08 One Mind Two Languages surveys current research in language processing from both linguistic and psycholinguistic perspectives in individuals who speak more than one language. Such research bears on a broad range of questions relating to whether language can shape thought and what it means to be proficient in a language as well as formal theories of linguistics and language processing. The volume focuses on how the multi language user represents and processes linguistic information. Chapters include an overview of methodological issues in bilingual research, new empirical research and extensive summaries of relevant past work. This is an invaluable resource for anyone interested in state of the art research on the status of language processing in bilinguals. Kindliche Kommunikation - einsprachig und mehrsprachig Katharina Meng, Katharina Meng, Wilhelm Griehaber, Jochen Rehbein, Jochen Rehbein, In der Kindlichen Kommunikation vollzieht sich die kindliche Sprachentwicklung. Kindliche Kommunikation ist eine notwendige Bedingung der Ontogenese sprachlicher Fähigkeiten. Die Einführung des Buches verortet die sprachpsychologischen und sprachwissenschaftlichen Grundlagen der Forschung zur Kindlichen Kommunikation im 19. und 20. Jahrhundert bis hin zu Jean Piaget, Karl Bühler und zu der gesellschaftlichen Psychologie Lev Vygotskijs. Dabei wird Spracherwerb als die Aneignung sprachlicher Fähigkeiten und Handlungen konzipiert, die als Verarbeitung sprachlicher Kommunikation in einem altersspezifischen Entwicklungsprozess vor sich geht. Die beiden grundsätzlichen Ansätze der Kindersprachforschung, die sich in neuerer Zeit auf Vygotskij beziehen, die Fähigkeitstheorie und die Funktionale Pragmatik, werden zusammengeführt und auf Mehrsprachigkeit hin erweitert. Für eine differenzierte Sprachentwicklung und die damit im unmittelbaren Zusammenhang stehende Entwicklung höherer mentaler Prozesse ist der Ausbau des Diskurses durch Vorlesen, Erzählen und das gemeinsame Reflektieren wichtig, nicht zuletzt als Grundlage für die schulische Texthabitualisierung. Die allesamt empirischen Beiträge dieses Buches sind verschiedenen Aspekten dieser Fragen gewidmet und stellen den Spracherwerb in das Spannungsfeld von Mündlichkeit und Schriftlichkeit, Diskurs, Grammatik und Text. Ein besonderer Leckerbissen ist der Fund der Arbeit Lev Vygotskijs zur Mehrsprachigkeit in der frühen Kindheit von 1928/1929, in der bereits ein Wechselverhältnis von mehrsprachiger individueller Entwicklung und mehrsprachigen gesellschaftlichen Kommunikationsstrukturen und -konstellationen formuliert wurde.

Einführung in die Mehrsprachigkeitsforschung Natascha Müller, 2006 **Sprache und Kognition** Barbara Mertins, 2018-08-21 Ist unser Denken und somit die Weltansicht für alle Menschen gleich oder sprachspezifisch? Auf diese uralte Fragestellung, der bereits Wilhelm von Humboldt nachgegangen ist, gibt dieses Buch eine eindeutig bejahende Antwort. Unsere Weltanschauung wird durch die Grammatik der eigenen Muttersprache geprägt, sodass Menschen Ereignisse sprachspezifisch wahrnehmen, versprachlichen und auch erinnern. Diese grundlegenden Erkenntnisse sind durch den hier gewählten experimentellen Zugang psycholinguistischer Methoden, z. B. Eye Tracking, erstmalig möglich. Der Einfluss von Sprache auf Kognition erweist sich darüber hinaus für

Sprachkontakt als extrem relevant Infolge des über Jahrhunderte andauernden Sprachkontakts zwischen dem Deutschen und Tschechischen hat sich das Aspekt System des Tschechischen dahingehend geändert dass die Ereigniskonzeptualisierung im Tschechischen wie im Deutschen verläuft und das Tschechische sich systematisch von anderen ost und westslawischen Sprachen absetzt *Language Contact and Linguistic Aspects of Bilingualism* Longxing Wei, 2024-07-24 This book consolidates earlier insights and proposes a model of contact linguistics and an innovative approach to the study of bilingualism It explores the nature of major language contact phenomena especially lexical borrowing mixed languages bilingual lexical and grammatical processing and representations second language acquisition codeswitching and interlanguage It examines the universal principles governing grammatical structures of languages in contact and differentiates the lexical and grammatical features of morphemes as outcomes of language contact The proposed approach describes and explains some outstanding linguistic aspects of bilingualism with a focus on the mechanisms of the bilingual mind during bilingual processing and production at several levels of abstract lexical structure Abundant naturally occurring examples support the claim that the languages in contact are never equally activated and that language specific abstract entries in the bilingual mental lexicon are in contact resulting in mutual influence during codeswitching second language learning and interlanguage development **The Handbook of Second Language Acquisition** Catherine J. Doughty, Michael H. Long, 2008-04-15 The Handbook of Second Language Acquisition presents an integrated discussion of key and sometimes controversial issues in second language acquisition research Discusses the biological and cognitive underpinnings of SLA mechanisms processes and constraints on SLA the level of ultimate attainment research methods and the status of SLA as a cognitive science Includes contributions from twenty seven of the world's leading scholars Provides an invaluable resource for all students and scholars of human cognition including those in linguistics psychology applied linguistics ESL foreign languages and cognitive science **The Handbook of Bilingualism** Tej K. Bhatia, William C. Ritchie, 2006-01-23 This handbook provides state of the art treatments of the central issues that arise from the study of the phenomena of bilingualism It explores topics ranging from the bilingual brain to bilingual education Third Language Acquisition and Linguistic Transfer Jason Rothman, Jorge González Alonso, Eloi Puig-Mayenco, 2019-10-10 Provides a comprehensive overview of third language acquisition additive multilingualism in adulthood an increasingly important subfield of language acquisition **LiLi, Zeitschrift für Literaturwissenschaft und Linguistik**, 2006 **Bilingualer Sprachgebrauch bei Jugendlichen im deutsch-dänischen Grenzland** Karoline H. Kühl, 2008 Patterns of Language Processing and Growth in Early English-Spanish Bilingualism Barbara Therese Conboy, 2002 Four studies explored patterns of language growth and processing in 64 19 31 month old bilingual children acquiring English and Spanish In the first study cross sectional and longitudinal methods revealed significant relationships between vocabulary size and grammatical development replicating previous studies with monolingual children The compositions of children's lexicons in each language

were linked to vocabulary size in that language With few exceptions utterance length and complexity and the emergence of closed class and predicate terms in each language were linked more closely to vocabulary size in the same language than to total conceptual vocabulary TCV size In the second study performance on English and Spanish sentence repetition tests was compared for bilingual and monolingual children matched for vocabulary size in each language The performance of the bilingual children was similar to that of their monolingual controls indicating links between grammatical ability and vocabulary development within the same language The slightly better performance of the bilingual children on a few comparisons suggested some degree of cross linguistic bootstrapping In the third study event related potentials ERPs were used to investigate the neural activity of bilingual children as they processed known and unknown words There were differences in the timing and distribution of the ERP amplitude differences to known vs unknown words for each language and differences in these effects when children with larger TCV sizes were compared to those with smaller TCV sizes These results thus replicated studies with monolingual children that found links between vocabulary development and the organization of ERP effects although the exact patterns were different for the bilingual and monolingual children In the fourth study the effects of mixed vs blocked language testing conditions on ERP patterns were investigated Results indicated that some of the differences in ERP effects between the monolingual and bilingual children noted in the third study may have been due to processing demands created by the mixed language testing condition in which the bilingual children were tested The results of these four studies support experience based accounts of early language acquisition and further establish the use of combined behavioral neural imaging approaches for studying language development in bilingual toddlers
