Social Media Marketing on Instagram. Exploration of Strategic Perspectives Lisa Jessen, 2018-06-20 Master's Thesis from the year 2018 in the subject Communications Public Relations Advertising Marketing Social Media grade 1.7 University of Potsdam language English abstract With 800 million users worldwide, Instagram is one of the world's leading social media platforms. The reason for the increasing relevance of Instagram is its mobile, local, social, and visual character, which reflects how individuals are currently using social media and will continue to do so in the future. Instagram's combination of emotional, visual content, story telling, and interaction with the community also makes it a platform that allows brands to differentiate themselves from others to become unique in what are often very saturated markets. While Instagram is a new application and previous research focuses mainly on long-established social media platforms such as Facebook, this thesis aims to explore the various strategic perspectives of successful social media marketing on Instagram by developing a theoretical framework and presenting the practical strategies of three very different organisations in a multiple case study design. The framework and the case studies prove that the five identified social media dimensions: content marketing, engagement marketing, influencer marketing, hashtags, and Instagram advertising, are applied in practice but are adapted very individually on each organisation, its goals, and its target group.
