Management with Online Study Tools 12 Months Danny Samson, Timothy Donnet, Richard L. Daft, 2017-10-25
Samson Daft Donnet's Management is a robust foundation text providing a balance of broad theoretical content with an engaging easy to understand writing style. It covers the four key management functions: planning, organising, leading, and controlling, conveying to students the elements of a manager's working day. Along with current management theory and practice, the authors integrate coverage of innovation, entrepreneurship, agile workplaces, social media, and new technology throughout. This sixth edition features a new author on the team and contains updates to content based on recent research. Real life local and international examples showcase the ongoing changes in the management world. Focusing on a skills approach, they bring concepts to life for students, supporting motivation, confidence, and mastery. Each part concludes with a contemporary continuing case study focusing on car company Toyota as it faces managerial challenges and opportunities in the region.

The Political Power of Global Corporations John Mikler, 2018-01-25
We have long been told that corporations rule the world, their interests seemingly taking precedence over states and their citizens. Yet while states, civil society, and international organizations are well drawn in terms of their institutions, ideologies, and functions, the world's global corporations are often more simply sketched as mechanisms of profit maximization. In this book, John Mikler recasts global corporations as political actors with complex identities and strategies. Debunking the idea of global corporations as exclusively profit-driven entities, he shows how they seek not only to drive or modify the agendas of states but to govern in their own right. He also explains why we need to re-territorialize global corporations as political actors that reflect and project the political power of the states and regions from which they hail. We know the global corporations' names, we know where they are headquartered, and we know where they invest and operate. Economic processes are increasingly produced by the control they possess, the relationships they have, the leverage they employ, the strategic decisions they make, and the discourses they create to enhance acceptance of their interests. This book represents a call to study how they do so rather than making assumptions based on theoretical abstractions.
