Cordani Jr., 2022-01-04 One of the most debated topics in law and politics is the role that science should play in setting policy What does it mean to demand that politicians and the People themselves follow the science if science deals with questions of fact not matters of moral or political values This long standing controversy has roots ranging from Plato s philosopher kings to Enlightenment skepticism to modern progressivism and the rise of the administrative state Science and Liberty explores the idea that a constitutional republic provides a fitting role for science while preserving the People s liberty and right to self government It examines this topic from five perspectives American Historical Philosophical Scientific and Moral Providing direct access to primary historical sources Science and Liberty contends that America s founders designed a constitution that was predicated on the Enlightenment theory that liberty precedes government and that presupposed the engagement of the People and their representatives at all levels of free debate Early twentieth century progressivism was openly hostile to these founding principles in its desire for efficient rule by scientific administrators However it is impossible to philosophically ground political and moral values in the findings of science despite what modern theorists claim Ultimately the injunction to follow the science demands to substitute the values of experts for the values of the People themselves By illustrating numerous examples from the hard and social sciences ranging from physics to Biblical criticism to climate science this book also explains that the People have a role to play in reasonably engaging with and critiquing modern science Science and Liberty will appeal to those interested in a variety of subjects including law politics philosophy and intellectual history as well as scientific criticism particularly from an American perspective It is written to be accessible for all ages while also engaging with complex issues and sources relevant for those with advanced degrees *The Republican Ethic- President Ram Nath Kovind Selected Speeches (July 2017-July 2018)* Publications Division, 2018-12-08 President Ram Nath Kovind assumed office on July 25 2017 and in a short span of one year has been able to make a distinct mark in the way he reaches out to the citizens of the country With the heart of a common man he understands the challenges that India faces as a nation while as an erudite mind he has the vision of the India s rightful place of eminence among the comity of nations The book *The Republican Ethic* is a collection of 95 of his

selected speeches out of a total of 243 made by him in the first year of office They have been divided in eight sections viz Addressing the Nation Diversity of India Window to the World Educating India Equipping India Dharma of Public Service Honouring our Sentinels Spirit of the Law and Acknowledging Excellence The book has been conceived to help the readers assess the vision and thought that the President espouses specially with relation to the vision of nation and individual citizen s duties Something Incredibly Wonderful Happens K.C. Cole,2024-05-31 How do we reclaim our innate enchantment with the world And how can we turn our natural curiosity into a deep abiding love for knowledge Frank Oppenheimer the younger brother of the physicist J Robert Oppenheimer was captivated by these questions and used his own intellectual inquisitiveness to found the Exploratorium a powerfully influential museum of human awareness in San Francisco that encourages play creativity and discovery all in the name of understanding In this elegant biography K C Cole investigates the man behind the museum with sharp insight and deep sympathy The Oppenheims were a family with great wealth and education and Frank like his older brother pursued a career in physics But while Robert was unceasingly ambitious and eventually came to be known for his work on the atomic bomb Frank s path as a scientist was much less conventional His brief fling with the Communist Party cost him his position at the University of Minnesota and he subsequently spent a decade ranching in Colorado before returning to teaching Once back in the lab however Frank found himself moved to create something to make the world meaningful after the bombing of Hiroshima and Nagasaki He was inspired by European science museums and he developed a dream of teaching Americans about science through participatory museums Thus was born the magical world of the Exploratorium forever revolutionizing not only the way we experience museums but also science education for years to come Cole has brought this charismatic and dynamic figure to life with vibrant prose and rich insight into Oppenheimer as both a scientist and an individual Index to the Catalogue of Books in the Upper Hall of the Public Library of the City of Boston Boston Public Library,1861 **Index to the Catalogue of Books in the Bates Hall of the Public Library of the City of Boston** ,1865 Nineteenth Century Short Title Catalogue Averro Publications Limited,1984

This Gifted Age John C. Gibbons,1997-10-01 This welcome collection provides a glimpse of the power of a scientific training combined with a humane outlook in approaching major issues of public policy Few people have spoken more wisely to the larger issues of science and technology in our national life Frank T Rhodes President Emeritus Cornell University The Literary Journal, and Weekly Register of Science and the Arts ,1834 **The College Courant** ,1868 **The Lancet** ,1846 "The" Medical Times and Gazette ,1883 **The American Phrenological Journal and Repository of Science, Literature and General Intelligence** ,1858 **Research in the Social Scientific Study of Religion, Volume 33** ,2023-06-19 Volume 33 of Research in the Social Scientific Study of Religion brings together an open section and two special sections that illuminate new vistas in the study of religious and non religious belief Special section 1 examines the historical roots of religious practice emerging from Greater Khur s n a historical cross road for many world religions Special

section 2 initiates a paradigm shift in study of religious and non religious belief in relation to children insisting upon foregrounding children s narratives Both special sections explore under researched areas underlining the significance of historical and contextual approaches At an intrinsic level the volume interrogates the power dynamics that determine why particular voices and approaches are prioritised in the study of religious and non religious belief and why others remain under or mis heard
