Organizational Interoperability In E Government Lessons From 77 European Good Practice Cases:

Organizational Interoperability in E-Government Herbert Kubicek, Ralf Cimander, Hans Jochen Scholl, 2011-08-04 In the e government research community as well as in many national e government programs interoperability is widely seen as a key factor in developing effective and attractive e services There is also agreement that interoperability encompasses not only mere technical standards and interfaces but also includes organizational legal and cultural aspects Several interoperability frameworks have been introduced on national and international levels and recommendations have been made for the adaptation of enterprise architectures in the public sector Common to all these approaches is their top down deductive procedure which does not connect very well to the real world of e government projects In contrast in this volume which is based on empirical research the authors introduce a bottom up inductive approach to deal with the challenges of interoperability related governance Based on so called good practice cases of interoperability in e government they derive concepts and classifications that help to uncover and assess similarities and differences between the cases As a result they present an empirically based conceptual framework that details the options for IT governance of interoperability in government In addition their findings also make it possible to critically assess and improve other existing frameworks With this work which combines different thematic foci as well as a European and a US background the authors situate empirical results in the broader context of theoretical and political reflection Thus they provide insights into strategic choices for CIOs in e government at a national or regional level experiences and lessons learned for managers and developers in e government projects and a huge set of empirical data for administrative and political scientists *Electronic Government* Hans Jochen Scholl, Olivier Glassey, Marijn Janssen, Bram Klievink, Ida Lindgren, Peter Parycek, Efthimios Tambouris, Maria A.
