Organizing The Spontaneous:

Organizing the Spontaneous Wesley Sasaki-Uemura, 2001-05-01 In 1960 millions of Japanese citizens took to the streets for months of protest against the U S Japan Security Treaty Anpo and its forcible ratification by the Kishi government In the decades that followed the Anpo era citizens movements exerted a major influence on the organization and political philosophies of the anti Vietnam War effort local residents environmental movements alternative lifestyle groups and consumer movements Organizing the Spontaneous departs from previous scholarship by focusing on the significance of the Anpo protests on the citizens drive to transform Japanese society rather than on international diplomacy It shows that the movement against Anpo comprised diverse at times conflicting groups of politically conscious actors attempting to reshape the body politic

Place in Research Eve Tuck, Marcia McKenzie, 2014-08-07 Bridging environmental and Indigenous studies and drawing on critical geography spatial theory new materialist theory and decolonizing theory this dynamic volume examines the sometimes overlooked significance of place in social science research There are often important divergences and even competing logics at work in these areas of research some which may indeed be incommensurable This volume explores how researchers around the globe are coming to terms both theoretically and practically with place in the context of settler colonialism globalization and environmental degradation Tuck and McKenzie outline a trajectory of critical place inquiry that not only furthers empirical knowledge but ethically imagines new possibilities for collaboration and action Critical place inquiry can involve a range of research methodologies this volume argues that what matters is how the chosen methodology engages conceptually with place in order to mobilize methods that enable data collection and analyses that address place explicitly and politically Unlike other approaches that attempt to superficially tag on Indigenous concerns decolonizing conceptualizations of land and place and Indigenous methods are central not peripheral to practices of critical place inquiry

Reichle, Hope A. Seligson, Kimberley Shoaf, Jerry Treiman, Anne M. Wein, 2008 Accompanying CD ROM contains PDF of book *Spontaneous Combustion* Jason Del Gandio, AK Thompson, 2017-08-28 Provides answers to one of the enduring paradoxes of mass social change From the

events of May 1968 to the Arab Spring and Occupy we have seen social movements develop spontaneously around the globe propelling thousands and at times millions of people into the streets to demand an end to oppression In order to make sense of such events the authors draw on George Katsiaficas's conception of the eros effect which picks up and takes off from concepts developed by Herbert Marcuse This effect describes moments in which the instinctual human need for justice and freedom undergoes a massive spontaneous awakening Drawing on Marcuse the concept foregrounds the instinctual foundation of the desire for freedom in which a biologically based pleasure drive eros is given free play from the Foreword by Peter Marcuse However even as the eros effect provides a valuable framework for understanding spontaneous global uprisings Katsiaficas has acknowledged that the concept has remained underdeveloped Spontaneous Combustion provides an introduction to the eros effect along with a series of elaborations applications and critical rejoinders concerning its implications A truly interdisciplinary venture the book features contributions from cutting edge scholars and activists on the frontlines of today's struggles

The Politics of Crowds Christian Borch, 2012-04-12 This book analyses sociological discussions on crowds and masses since the late nineteenth century covering France Germany and the USA **Friedrich A. Hayek** John Cunningham Wood, Robert D. Wood, 2004 **Perspectives on Volunteering** Jacqueline Butcher, Christopher J. Einolf, 2016-08-10 This volume overlooks the distinct expressions and awareness of volunteering in the lived reality of people from different regions of the world By casting the net widely this book not only expands the geographic reach of experiences models and case studies but also transcends the conventional focus on formal volunteering It highlights institutional forms of volunteering specific to developing nations and also describes volunteering that is more loosely institutionalized informal and a part of solidarity and collective spirit As a result this book provides a different look at the values meaning acts and expressions of volunteering The chapters in this book consist of essays and case studies that present recent academic research thinking and practice on volunteering Working from the premise that volunteering is universal this collection draws on experiences from Latin America Africa including Egypt and Asia This book focuses on developing countries and countries in transition in order to provide a fresh set of experiences and perspectives on volunteering While developing countries and countries in transition are in the spotlight for this volume the developed country experience is not ignored Rather the essays use it as a critical reference point for comparisons allowing points of convergence disconnect and intersection to emerge

The State and Globalization Martin Upchurch, 1999 First Published in 1999 Routledge is an imprint of Taylor Francis an informa company Complexity and Organization Robert Macintosh, Donald Maclean, Ralph Stacey, Douglas Griffin, 2013-10-16 In the past decade complexity based thinking has exerted an increasing yet somewhat controversial authority over management theory and practice This has in some part been due to the influence of a number of high profile articles and the not inconsiderable hype which has accompanied them Another feature of the subject's development has been the diversity of the origins of the thinking and the claims which have been made for it in terms of managerial and

organizational implications Complexity and Organization is the first text to bring this thinking together presenting some of the most influential writing in the field showing how the subject has developed and how it continues to influence managerial thinking Seminal contributions to the field have been brought together in a single accessible volume allowing readers to access what might otherwise appear a very diverse body of literature Moreover the editors who represent some of the leading thinkers and writers in this field have combined these readings with a unique commentary indicating not only the importance of the papers but teasing out the subtle but significant differences and similarities between them These commentaries take the form of a discussion between the editors debating the contribution that each paper has made to the field and the influence it has had on management thinking Grounding Sociality Gün R. Semin, Gerald

Echterhoff, 2011-01-07 This volume shows how individuals overcome their biological neural and mental finitude to achieve sociality It reveals how we take each other into account coordinate our actions and share our inner states through communication It will be of interest to social psychologists and those working in cognition neuroscience and sociology

Sarajevo a small blissful city where a young boy's life is consumed with street soccer with the neighborhood kids resentment of his younger sister and trips abroad with his engineer cum beekeeper father Here a young man's life is about poking at the pretensions of the city's elders with American music bad poetry and slightly better journalism And then his life in Chicago watching from afar as war breaks out in Sarajevo and the city comes under siege no way to return home his parents and sister fleeing Sarajevo with the family dog leaving behind all else they had ever known and Hemon himself starting a new life his own family in this new city And yet this is not really a memoir The Book of My Lives Hemon's first book of nonfiction defies convention and expectation It is a love song to two different cities it is a heartbreaking paean to the bonds of family it is a stirring exhortation to go out and play soccer and not for the exercise It is a book not only driven by passions but also built on fierce intelligence devastating experience and sharp insight And like the best narratives it is a book that will leave you a different reader a different person with a new way of looking at the world when you've finished The Book of My Lives is written with the full force of humanity It will make you think laugh cry and remember yourself If you've never read Aleksandar Hemon prepare to have your worldview deepened Jonathan Safran Foer You should read Aleksandar Hemon's memoir for the same reason you should read his fiction He is not only a remarkably talented writer but also one of the great social observers a cultural anthropologist who seems at home everywhere and nowhere and who balances despair with hope anger with humor Benjamin Percy NPR *Manual for integrated field data collection* FAO,FAO, Rome (Italy).
