The Routledge Handbook of Digital Literacies in Early Childhood Ola Erstad,Rosie Flewitt,Bettina Kümmerling-Meibauer,Íris Susana Pereira,2019-07-05 As fast evolving technologies transform everyday communication and literacy practices many young children find themselves immersed in multiple digital media from birth Such rapid technological change has consequences for the development of early literacy and the ways in which parents and educators are able to equip today s young citizens for a digital future This seminal Handbook fulfils an urgent need to consider how digital technologies are impacting the lives and learning of young children and how childhood experiences of using digital resources can serve as the foundation for present and future development Considering children aged 0 8 years chapters explore the diversity of young children s literacy skills practices and expertise across digital tools technologies and media in varied contexts settings and countries The Handbook explores six significant areas Part I presents an overview of research into young children s digital literacy practices touching on a range of theoretical methodological and ethical approaches Part II considers young children s reading writing and meaning making when using digital media at home and in the wider community Part III offers an overview of key challenges for early childhood education presented by digital literacy and discusses political positioning and curricula Part IV focuses on the multimodal and multi sensory textual landscape of contemporary literary practices and how children learn to read and write with and across media Part V considers how digital

technologies both influence and are influenced by children's online and offline social relationships Part VI draws together themes from across the Handbook to propose an agenda for future research into digital literacies in early childhood A timely resource identifying and exploring pedagogies designed to bolster young children's digital and multimodal literacy practices this key text will be of interest to early childhood educators researchers and policy makers

Shifting Strands Bryant Griffith, 2012-12-19 In this the sixth book of a series of exploratory and cautionary tales Griffith revisits the sites of reflective knowledge and practical experiences that have been our historical presuppositions and which are now in the process of flux and change As in his previous books historical discourse what we know and can know about the past is used as the baseline for understanding This is an ongoing process where ideas are considered used to interact with other ideas and then among communities of learners are incorporated supplanted or rejected This is more than a dialectical process because it is based in human action In education broadly speaking we have taught and have learned that this was a linear rational path that could be mapped but in today's fragmented decentered world of difference we can no longer be certain that our presuppositions hold or apply Using the analogy of shifting strands this book provides a way of coming to understand rather than a way of knowing It suggests that our emerging paradigm will be grounded in presuppositions that are relative to person place and time and that certainty may be illusive The role of introducing ideas like these in a mass capitalist democracy such as ours is a staggering challenge and it is one that has fallen to educators whether they wish it or not Shifting Strands challenges both teachers and learners to take up the torch and run with it This can be accomplished by thinking in a way that is both historical and philosophical one that understands that learning occurs when we understand where our learners are situated in terms of place and thought Thinking and knowing about the world is relative to who you are and your ability to thinking in a critical and reflexive way This is only the first part of the challenge The second and no less important task is for you to realize the power of our polymodal world Increasingly we rely on social networks in our decision making and retreat from the more difficult process of negotiation and interaction but it is this process that schooling must explore and practice Our world is paradoxical There are few if any certainties and the trip to understanding our reasons for believing and acting as we do is one with many different routes It is an exciting time full of possibility and open to the maverick in you and open to your creative spirit Come along for the ride
