5. Österreichische Artificial-Intelligence-Tagung

Johannes Retti, Karl Leidlmair, 2012-12-06 Die 5. österreichische Artificial Intelligence Tagung setzt sich zusammen aus wissenschaftlichem Programm, Workshops und Tutorials. Der wissenschaftlich orientierte Teil des Tagungsprogramms umfasst sowohl eingeladene als auch begutachtete Vorträge zu den Themen Qualitative Schließen, Methodik Wissensbasierter Systeme und deren Anwendung, Logik, Deduktion, Natürlichsprachliche Systeme, Lernen und Kognition. Zum Informationsaustausch waren zusätzlich Workshops zur Weiterbildung vorgesehen. Besonders das Thema Philosophie und KI demonstrierte das allgemeine Interesse. Dies soll mit Beiträgen dokumentiert werden, die einen Überblick über Berührungspunkte der KI mit philosophischen Strömungen bieten und auch den Einfluss der KI als Teil der Informatik auf das philosophische Weltbild verdeutlichen. Rough Sets and Current Trends in Computing Shusaku Tsumoto, Roman Slowiński, Jan Komorowski, Jerzy W. Grzymala-Busse, 2004-05-21 In recent years rough set theory has attracted the attention of many researchers and practitioners all over the world who have contributed essentially to its development and applications. We are observing a growing research interest in the foundations of rough sets including the various logical, mathematical and philosophical aspects of rough sets. Some relationships have already been established between rough sets and other approaches and also with a wide range of hybrid systems. As a result, rough sets are linked with decision system modeling and analysis of complex systems, fuzzy sets, neural networks, evolutionary computing, data mining and knowledge discovery, pattern recognition, machine learning and approximate reasoning. In particular, rough sets are used in probabilistic reasoning, granular computing including information granule calculi based on rough mereology, intelligent control, intelligent agent modeling, identification of autonomous systems and process specification. Methods based on rough set theory alone or in combination with other approaches have been discovered with a wide range of applications in such areas as acoustics, bioinformatics, business and finance, chemistry, computer engineering (e.g. data compression, digital image processing, digital signal processing, parallel and distributed computer systems, sensor fusion, fractal engineering, decision analysis and systems, economics, electrical engineering (e.g. control, signal analysis, power systems), environmental studies, informatics, medicine, molecular biology, musicology, neurology, robotics, social science, software engineering, spatial visualization, Web engineering and Web mining.

Computer Science Logic Peter G. Clote, Helmut Schwichtenberg, 2003-06-29 This book constitutes the refereed

proceedings of the 13th International Workshop on Computer Science Logic (CSL 2000) held in Fischbachau, Germany, as the 8th Annual Conference of the EACSL in August 2000. The 28 revised full papers presented together with eight invited papers were carefully reviewed and selected by the program committee. Among the topics covered are automated deduction, theorem proving, categorical logic, term rewriting, finite model theory, higher order logic, lambda and combinatory calculi, computational

complexity logic programing constraints linear logic modal logic temporal logic model checking formal specification formal verification program transformation etc

Automated Deduction - CADE-21 Frank Pfenning, 2007-07-05 A veritable one stop shop for anyone looking to get up to speed on what is going down in the field of automated deduction right now This book contains the refereed proceedings of the 21st International Conference on Automated Deduction CADE 21 held in Bremen Germany in July 2007 The 28 revised full papers and 6 system descriptions presented were selected from 64 submissions All current aspects of automated deduction are addressed ranging from theoretical and methodological issues to presentation and evaluation of theorem provers and logical reasoning systems

The Functional Interpretation of Logical Deduction Anjolina G. de Oliveira, 2012 This comprehensive book provides an adequate framework to establish various calculi of logical inference Being an OCyenrichedOCO system of natural deduction it helps to formulate logical calculi in an operational manner By uncovering a certain harmony between a functional calculus on the labels and a logical calculus on the formulas it allows mathematical foundations for systems of logic presentation designed to handle meta level features at the object level via a labelling mechanism such as the D Gabbay s Labelled Deductive Systems The book truly demonstrates that introducing OCylabelsOCO is useful to understand the proof calculus itself and also to clarify its connections with model theoretic interpretations

General Analytical Chemistry Jean-Louis Burgot, 2024-09-13 This book is devoted to the quantitative electrochemical methods of analysis in solution A theoretical knowledge of each method is discussed The methods are illustrated with several examples covering a wide range of types of analysis The book is divided in three parts The first one is introductory It recalls some definitions and some basic concepts of electrochemistry The second part describes the methods themselves Are studied voltametric methods amperometry potentiometry conductometry the electrogravimetry and coulometry Some chapters are also dedicated to the chemical and electrochemical sensors The third part consists in a supplementary theoretical knowledge of each method

Advances in Logic Based Intelligent Systems Kazumi Nakamatsu, Jair Minoru Abe, 2005 LAPTEC 2005 promoted the discussion and interaction between researchers and practitioners focused on both theoretical and practical disciplines concerning logics applied to technology with diverse backgrounds including all kinds of intelligent systems having classical or non classical logics as underlying common matters

Inductive Synthesis of Functional Programs Ute Schmid, 2003-08-21 Because of its promise to support human programmers in developing correct and efficient program code and in reasoning about programs automatic program synthesis has attracted the attention of researchers and professionals since the 1970s This book focusses on inductive program synthesis and especially on the induction of recursive functions it is organized into three parts on planning inductive program synthesis and analogical problem solving and learning Besides methodological issues in inductive program synthesis emphasis is placed on its applications to control rule learning for planning Furthermore relations to problem solving and learning in cognitive psychology are discussed

Lerner, Boris L. Althsuler, Vladimir I. Fal'ko, Thierry Giamarchi, 2002-07-31 The physics of strongly correlated fermions and bosons in a disordered environment and confined geometries is at the focus of intense experimental and theoretical research efforts Advances in material technology and in low temperature techniques during the last few years led to the discoveries of new physical phenomena of atomic gases and a possible metal phenomena including Bose condensation insulator transition in two dimensional high mobility electron structures Situations where the electronic system is so dominated by interactions that the old concepts of a Fermi liquid do not necessarily make a good starting point are now routinely achieved This is particularly true in the theory of low dimensional systems such as carbon nanotubes or in two dimensional electron gases in high mobility devices where the electrons can form a variety of new structures In many of these systems disorder is an unavoidable complication and lead to a host of rich physical phenomena This has pushed the forefront of fundamental research in condensed matter towards the edge where the interplay between many body correlations and quantum interference enhanced by disorder has become the key to the understanding of novel phenomena Design Concepts in Programming Languages Franklyn Turbak, David Gifford, Mark A.
