Ortiz, Milind Tambe, 2003-07-31 As computer networks and computational grids become increasingly complex the problem of allocating resources within such networks in a distributed fashion will become more and more of a design and implementation concern This is especially true where the allocation involves distributed collections of resources rather than just a single resource where there are alternative patterns of resources with different levels of utility that can satisfy the desired allocation and where this allocation process must be done in soft real time Distributed Sensor Networks is the first book of its kind to examine solutions to this problem using ideas taken from the field of multiagent systems The field of multiagent systems has itself seen an exponential growth in the past decade and has developed a variety of techniques for distributed resource allocation Distributed Sensor Networks contains contributions from leading international researchers describing a variety of approaches to this problem based on examples of implemented systems taken from a common distributed sensor network application each approach is motivated demonstrated and tested by way of a common challenge problem The book focuses on both practical systems and their theoretical analysis and is divided into three parts the first part describes the common sensor network challenge problem the second part explains the different technical approaches to the common challenge problem and the third part provides results on the formal analysis of a number of approaches taken to address the challenge problem **Radioactive Waste Management** ,1981 **LOGCAP Battle Book** ,1998 Advanced Training Technologies and Learning Environments ,1999 Intelligent Decision-making Models for Production and Retail Operations Zhaoxia Guo, 2016-06-27 This book provides an overview of intelligent decision making techniques and discusses their application in production and retail operations Manufacturing and retail enterprises have stringent standards for using advanced and reliable techniques to improve decision making processes since these processes have significant effects on the performance of relevant operations and the entire supply chain In recent years researchers have been increasingly focusing attention on using intelligent techniques to solve various decision making problems The opening chapters provide an introduction to several commonly used intelligent techniques such as genetic algorithm harmony search neural network and extreme learning machine The book then explores the use of these techniques for handling various production and retail decision making problems such as production planning and scheduling assembly line balancing and sales forecasting Energy Research Abstracts ,1992-03 *Continued Operation of Los Alamos National Laboratory* ,2008
