Motivation In Education Theory Research And Applications 3rd Edition:

Motivation in Education Dale H. Schunk, Paul R. Pintrich, Judith L. Meece, 2010 The primary objectives of Motivation in Education Theory Research and Application third edition are to present major motivational theories principles and research findings in sufficient detail to help students understand the complexity of motivational processes and to provide examples of motivational concepts and principles applied to educational settings Although different perspectives on motivation are presented the text emphasizes the role of personal cognitions and beliefs during teaching and learning This focus is consistent with the view that learners are active constructive participants in the learning process consequently the text highlights how motivation is situated facilitated and constrained by various classroom and contextual factors Following an introductory chapter that defines and exemplifies motivation and discusses motivation research how motivation relates to learning and historical views of motivation the next six chapters discuss theoretical and conceptual perspectives that stress the role of personal cognitions beliefs affects and values in motivation expectancy value theory attribution theory social cognitive theory goal theory interest and affect and intrinsic and extrinsic motivation The remaining three chapters focus on various contextual factors in promoting motivation sociocultural influences teacher influences and classroom and school influences By blending theory research and applications throughout the text provides instructors and students with a unified view of the role of motivation in education

Motivation in Education: Theory, Research, and Applications Dale H. Schunk, Judith R Meece, Paul R. Pintrich, 2013-10-03 The academic standard for texts on motivation in educational settings Clear and engaging Motivation in Education Theory Research and Applications Fourth Edition presents the major motivation theories principles and research findings in sufficient detail to help students understand the complexity of motivational processes and provides extensive examples of the application of motivational concepts and principles in educational settings From reviews of Motivation in Education I find it essential that students have access to such strong representations of the basic theories and work in the field of motivation This book goes a long way toward reinforcing the voices of experts who make data driven decisions about how to foster motivation There are no available books on motivation as excellently crafted as this one Theresa A Thorildsen University of Illinois at Chicago This book is certainly the most comprehensive treatment of motivation There are several others I have perused but they often take a certain approach to motivation whereas this book covers ALL approaches The authors present a very complete and unbiased treatment of the literature Daniel H Robinson University of Texas Motivation, Selbstregulation und Leistungsexzellenz Markus Dresel, 2011

The Influence of Cultural Contexts in Learners' Attributions for Success and Failure in Foreign Language Learning Ana Sofia Gonzalez, 2015-10-05 Attribution theory has attracted considerable attention in recent years especially in the field of language learning A great share of the research conducted in this area has attempted to uncover factors that could influence learners perceptions of success and failure in foreign language learning Particular emphasis has been given to factors like age gender perceived level of success and language studied and some suggestions that learners cultures also play a part have been made although conclusions based on researchers assumptions of learners culture characteristics can run the risk of falling into stereotyping This book is the result of research conducted to show that learners cultural characteristics previously researched and analysed by means of grounded theory and factor analysis may influence not only the attributions mentioned by them for their successes and failures in learning English but also the way learners see these attributions in terms of their dimensions of locus of causality stability and controllability a classification that has been regarded as common sense and has therefore often been made by researchers themselves This book will be of interest to scholars whose research focus is in theories of motivation and self theories especially as they are applied to learning in general and language learning in particular It will also be useful to language teachers especially those working in foreign language learning contexts as they are in a good position to identify reasons for their learners lack of motivation caused by their success and failure perceptions and may have some ideas on how to retrain learners attributions particularly those which are more external and stable
