Environmental Policy and Impact Assessment in Japan Brendan F. D. Barrett, Riki Therivel, 2019-03-21 First published in 1991 Japanese attitudes to pollution and environmental protection were distinctly equivocal The Japanese are a nature loving people yet they are responsible for widespread environmental destruction Japan has some of the world's strictest environmental quality standards but the country also has some of the world's most environmentally damaged areas In this book the authors present a broad and detailed analysis of policy and process in Japan in the late twentieth century Brendan Barrett and Riki Therivel who both have extensive research experience in Japan describe interest group participation in Japan's environmental policy making and give an historical review of the relationship between economic growth and environmental problems They look at the framework for environmental policy making and outline the system for environmental management This is complemented by a discussion of Environmental Impact Assessment and by live case studies of the practical realities of EIA in Japan With environmental problems reaching global proportions countries all over the world have much to learn from the experience of Japan and the book will be extremely useful to national government officials to local planning officers responsible for EIA and to environmental consultants working for commercial and industrial companies It will also be essential reading for students of geography environmental studies Japanese studies and planning economics

Uriu,2019-04-15 Robert M Uriu analyzes the industrial policy making process in Japan for industries faced with sudden economic decline He takes exception to the traditional view that policy bureaucrats in Japan are autonomous and insulated from societal pressures arguing that the private sector in Japan has been actively involved in developing and implementing industrial policy After carefully defining his conceptual framework Uriu presents case studies of four industries cotton spinning steelmaking in minimills synthetic fibers and ship building along with less detailed examinations of coal mining aluminum smelting paper and steelmaking in integrated mills These industries he suggests have sought public policies that enable them to manage competition domestically In particular they have fostered cartels to control production or capacity levels in an attempt to stabilize their industry s conditions In textiles steel and ships Uriu focuses on several of the industries most important to Japan s early postwar economic successes the very ones first to confront the problems of decline and adjustment Uriu also shows how Japan s policy choices more recently have become constrained by changes in the domestic antitrust environment and in Japan s external relations In particular pressures from Japan s trading partners have limited the policy tools available to Tokyo As a result industries have experienced increasing difficulties over time in managing competition in the domestic market Analysts need to integrate domestic and international factors more carefully Uriu argues in order to trace more accurately the interactions between industry actors and the policy environment they face *Langenscheidt's standard German dictionary* Heinz Messinger,Gisela Türck,Helmut
