from a deeper sense of purpose and meaning The contributors though differing in their diagnoses and recommendations share the belief that this moment with its transformative possibility not be forfeit Equally they share the conviction that the chief ground of any such reorientation ineluctably involves our collective engagement with both ecology and theology

BACK COVER **Touch** Richard Kearney,2021-02-23 Our existence is increasingly lived at a distance As we move from flesh to image we are in danger of losing touch with each other and ourselves How can we combine the physical with the virtual our embodied experience with our global connectivity How can we come back to our senses Richard Kearney offers a timely call for the cultivation of the basic human need to touch and be touched He argues that touch is our most primordial

sense foundational to our individual and common selves Kearney explores the role of touch from ancient wisdom traditions to modern therapies He demonstrates that a fundamental aspect of touch is interdependence its inherently reciprocal nature which offers a crucial corrective to our fixation with control Making the case for the complementarity of touch and technology this book is a passionate plea to recover a tangible sense of community and the joys of life with others *Africa: Continent of Economic Opportunity* David Fick, 2007-04-01 Divided into geographic regions and representing every African nation this comprehensive collection of case studies explores how successful business enterprises of varying size along with community projects help to create jobs in Africa A valuable guide to conducting business anywhere on the continent this account also offers information on finding business opportunities and handling oft encountered problems **The Dirty Dozen** Bruce E. Johansen, 2003-06-30 Forty years after the publication of Rachel Carson's *Silent Spring* this important study examines the history industrial uses and harmful effects of the twelve most commonly used organochloride chemicals All have been fully or partially banned by the Stockholm Protocol an international treaty signed by about 120 countries in December 2000 Among the twelve are the dioxins the active ingredient in Agent Orange and polychlorinated biphenyls PCBs which are toxic in minute quantities Johansen pays special attention to the Inuit of the Arctic where these chemicals have been bio accumulating to dangerous levels moving up the food chain to a degree of toxicity that some Inuit mothers are no longer able to safely breast feed their infants The polar stratospheric ozone has been devastated by emissions of chlorofluorocarbons CFCs and new scientific findings connect global warming near the Earth's surface to significant cooling in the stratosphere This synergy aggravates ozone depletion because the chemical reactions that destroy the ozone become more energetic as temperatures drop Synthetic toxins have taken their toll on minority ethnic groups in the United States and persistent organic pollutants have inflicted physiological damage on humans and other animals Finally Johansen explores the estrogenic effects of such chemicals Sperm counts have declined as much as 50% in 50 years **Geographic Notes**, 1990
