1. What are two real world examples of friction?
2. How is inertia taking place if a penny is at rest?
3. How would an object's speed and/or direction be affected if force is applied to the moving object?
4. What force would you need to overcome when sliding your desk across the room?
5. Without gravity, what will happen to a ball that you throw?
6. What is inertia?
7. What are two real world examples of inertia?
8. What is Newton's First Law?
9. Does mass change how fast an object falls to the ground?
10. Does inertia depend on speed or mass? How?
11. Without gravity, does it require force to move an object?
12. When riding in the car, and the brakes are applied quickly, why does your body move forward?
13. Explain how Newton's First Law applies to the following situation: A baby is sitting on a swing at rest. The swing does not move until a force acts upon it.
14. What is potential energy?
15. What is kinetic energy?

16. What are two real world examples of friction?
 - When you slide down a slide, the friction between your legs and the slide slow you down.
 - When a car is driving and the brakes are applied, the tires and the road have friction to slow the car down.

Forty-five New Force and Motion Assessment Probes Page Keeley, Rand Harrington, 2010 Nationally known science educator Page Keeley principal author of the hugely popular four volume NSTA Press series Uncovering Students Ideas in Science has teamed up with physicist and science educator Rand Harrington to write this first volume in their new series on physical science They begin with one of the most challenging topics in physical science force and motion The 45 assessment probes in this book enable teachers to find out what students really think about key ideas in force and motion The Teacher Notes which can be used before and after administering the probe provide background information on the purpose of the probe related concepts an explanation for the teacher of the force and motion idea being taught related ideas in Benchmarks for Science Literacy and the National Science Education Standards research on typical student misconceptions related to the force and motion concept and suggestions for instruction and assessment The book specifies grade spans K 4 5 8 9 12 for each probe based on state and national standards and suggests ways to adapt a probe for a different grade span or context
