**HT820
Bluetooth®
Stereo Headphones**

USE THE HT820

Before using this product, read the Important Safety and Legal Information pamphlet and follow its instructions.

You can use your HT820 headphones simultaneously with a Bluetooth A2DP enabled audio device and your Bluetooth cell phones!

Listen to music, hear a beep, and transfer to take the call on the headphones. Hang up the call with a push of a button and your music automatically continues playing.

Ready to make it work?

- Charge your Headphones for 2 Hours (CHARGE)
- Pair headphones & audio device (PAIR)
- Pair phone & headphones (back side of this guide)
- Listen to music and take calls!

**The Bluetooth Enabled Audio Device must be A2DP compatible*

① CHARGE Your Headphones' Battery

Before using your HT820 for the first time, charge the headphones for 2 hours:

- 1 Plug the Motorola charger into the headphones. The indicator light turns on when the battery is charging. When the headphones' battery is fully charged, the indicator light turns off.

- 2 Disconnect the charger.

Note: Headphones do not function while charging.

You can also use a Motorola Original™ Vehicle Power Adapter to charge your headphones while in your vehicle.

A fully charged battery provides approximately: 14 hrs of music listening, 17 hrs of talk time, or 500 hrs of standby time.

② PAIR

Before you can use your headphones with a Bluetooth enabled product, you must pair it with that product. To pair:

- 1 Make sure your headphones are turned off (see *Turning On and Off*) and press and hold the left side Call button for 6 seconds until the indicator light turns on and remains steadily lit.

Call Button with Indicator Light (Left Side)

- 2 Next, put your Bluetooth Enabled audio device in pairing mode so the devices can "talk" to each other.

For details about putting Bluetooth Enabled devices in pairing mode, refer to the device's User's Guide for directions.

Note: To pair the headphones with your phone, see "Pair with your Phone," on the reverse side of this guide.

Bluetooth Application Programming with the Java APIs Essentials Edition Timothy J. Thompson, C Bala Kumar, Paul J. Kline, 2008-04-02 Adoption of Bluetooth wireless technology has become ubiquitous in the last few years One of the biggest steps forward is the standardization of Java APIs for Bluetooth wireless technology JABWT The latest updates to this standard is explained in detail in this book The JABWT standard defined by the JSR 82 Java Specification Request supports rapid development of Bluetooth applications that are portable secure and highly usable Wireless device manufacturers have responded overwhelmingly to the JABWT specification by implementing JABWT applications in mobile phones and other personal wireless communications products Bluetooth Application Programming Essentials Programming with the Java APIs explains in detail how to write Bluetooth applications using the Java APIs to exploit the power of both technologies Written by the specification lead for JSR 82 and two other key participants in developing the standards of JABWT this book provides the authoritative explanations and concrete examples needed to get started right away This book provides embedded Java developers with to the point information on the APIs in the specification with detailed programmatic examples of the APIs in use A NEW chapter on the Push Registry definition a new feature in the 1.1 version of JSR 82 has been added Finally the new Essentials version of the book will update the remaining chapters to reflect changes in the latest Bluetooth spec 2.1 and the industry as a whole By focusing only on the essentials this concise resource enables software and hardware vendors to quickly develop Bluetooth applications for mobile devices in an increasingly competitive market The updated material examines crucial programming areas including RFCOMM OBEX device discovery service discovery and L2CAP which allows developers to not only successfully design but master and build Java APIs for Bluetooth Wireless

Technology Includes a new and valuable chapter that delineates the pivotal Push Registry feature a recent development that will help programmers avoid the common problem of connection collision By providing real world issues and problems involved in implementing the Java APIs specification the book allows developers to identify with the text and encourages repeated reference
