Forthcoming Books Rose Arny, 1996-06 *DNA Based Computers III* Harvey Rubin, David Harlan Wood, 1999 This volume presents the proceedings from the third DIMACS workshop on DNA Based Computers held at the University of Pennsylvania Philadelphia The workshop was part of the Special Year on Molecular Biology and the Special Year on DNA Computing The focus of this workshop was on the multidisciplinary nature of the conference with emphasis on the interaction between biology and biochemistry on one hand and computer science and mathematics on the other *Experimental and Efficient Algorithms* , 2005 **Comprehensive Functional Verification** Bruce Wile, John Goss, Wolfgang

Roesner,2005-05-26 One of the biggest challenges in chip and system design is determining whether the hardware works correctly That is the job of functional verification engineers and they are the audience for this comprehensive text from three top industry professionals As designs increase in complexity so has the value of verification engineers within the hardware design team In fact the need for skilled verification engineers has grown dramatically functional verification now consumes between 40 and 70% of a project s labor and about half its cost Currently there are very few books on verification for engineers and none that cover the subject as comprehensively as this text A key strength of this book is that it describes the entire verification cycle and details each stage The organization of the book follows the cycle demonstrating how functional verification engages all aspects of the overall design effort and how individual cycle stages relate to the larger design process Throughout the text the authors leverage their 35 plus years experience in functional verification providing examples and case studies and focusing on the skills methods and tools needed to complete each verification task Comprehensive overview of the complete verification cycle Combines industry experience with a strong emphasis on functional verification fundamentals Includes real world case studies *Mathematics of Industrial Systems* Rainer E. Burkard,2002
