Application of Nanotechnology in Food Science and Food Microbiology Jayanta Kumar Patra, Han-Seung Shin, Spiros Paramithiotis, 2018-06-25 Nanotechnology is a fast evolving discipline that already produces outstanding basic knowledge and industrial applications for the benefit of society. It is a new emerging and fascinating field of science that permits advanced research in many areas. The first applications of nanotechnology mainly concerned material sciences applications in the agriculture and food sectors are still emerging. Food science nanotechnology is an area of rising attention that unties new possibilities for the food industry. Due to the rapid population growth, there is a need to produce food and beverages in a more efficient, safe, and sustainable way. The application of nanotechnology in food has also gained great importance in recent years in view of its potential application to improve production of food crops, enhance nutrition, packaging, and food safety overall. The new materials, products, and applications are anticipated to bring lots of improvements to the food and related sectors, impacting agriculture and food production, food processing, distribution, storage, sanitation, as well as the development of innovative products and sensors for effective detection of contaminants. Therefore, nanotechnology presents with a large potential to provide an opportunity for the researchers of food science, food microbiology, and other fields to develop new tools for incorporation of nanoparticles into food systems that could augment existing functions and add new ones. However, the number of relative publications currently available is rather small. The present Research Topic aims to provide with basic information and practical applications regarding all aspects related to the applications of nanotechnology in food science and food microbiology, namely nanoparticle synthesis, especially through the eco-friendly perspective, potential applications in food processing, biosensor development, alternative strategies for effective pathogenic bacteria monitoring, as well as the possible effects on human health and the environment. Enterprise and Economic Development in Africa Dina M. Nziku, John J. Struthers, 2021-06-11 Presenting a topical analysis of the challenges and achievements of enterprise, Enterprise and Economic Development in Africa examines contributions to economic development on the continent as well as exploring implications for policy dimensions. Philosophy, Language, and Literature in an African Context Wilfred Lajul, 2024-12-16 Philosophy, Language, and Literature in an African Context investigates the link between philosophy and language in African literature. Wilfred Lajul and the contributors argue that African literature is more than the desire of literary writers to entertain or provoke thought but rather a stylistic means through which they convey important information and philosophy. This book also probes into theories, contexts, and moral language in African literature, exploring their implications for language use. The contributors analyze linguistic, philosophical, and cultural worldviews of the African literary writers shown within their poetry, novels, and plays. This book provides new ways of understanding the relationship between philosophy and language in African literature. **African Christian Theology, Volume 1, Number 1, March 2024** Joshua Robert Barron, 2024-07-11 **Kenya Gazette**, 1952-05-20 The Kenya Gazette is an official publication of the government of the

The Status of Student Involvement in University Governance in Kenya Mulinge, Munyae M.,Arasa, Josephine N.,2017-05-05 This book examines the concept of the democratization of governance in universities in Kenya with particular emphasis on students involvement in governance processes and decision making Data were collected from members of the student community utilizing a structured self administered questionnaire and from purposively selected key informants and focus group discussants drawn from Kenyatta University representing the public sector and the United States International University representing the private sector The guiding argument for the study was that shared governance one of the principles of good governance is critical in enabling the universities to deliver their visions and the missions effectively The results revealed that while in principle Kenyan universities have embraced democratic governance in which all stakeholders including students have a role to play in practice they continue to violate the core principles of good governance particularly shared governance Specifically students who are major stakeholders in university education are largely excluded from significant structures of governance thereby limiting their influence and participation Although their representation is mainly provided via student self governance organs unions associations and or councils their effectiveness is undermined considerably by the lack of trust and confidence of the student body and the unending manipulation by top university administrators and external political actors Student active involvement in decision making is mainly confined to lower levels such as the school faculty and departmental programme The authors call for a paradigm shift in the involvement of students in the governance of universities in ways that discourage the current culture of tokenism and political correctness that characterizes public and private universities in Kenya
