Motion And Representation The Language Of Human Movement:

Motion and Representation Nicolas Salazar Sutil, 2015-05-08 An examination of the ways human movement can be represented as a formal language and how this language can be mediated technologically In Motion and Representation Nicol s Salazar Sutil considers the representation of human motion through languages of movement and technological mediation He argues that technology transforms the representation of movement and that representation in turn transforms the way we move and what we understand to be movement Humans communicate through movement physically and mentally To record and capture integrated movement both bodily and mental by means of formal language and technological media produces a material record and cultural expression of our evolving kinetic minds and identities Salazar Sutil considers three forms of movement inscription a written record notation a visual record animation and a computational record motion capture He focuses on what he calls kinetic formalism formalized movement in such pursuits as dance sports live animation and kinetic art as well as abstract definitions of movement in mathematics and computer science He explores the representation of kinetic space and spatiotemporality the representation of mental plans of movement movement notation including stave notation Labanotation and such contemporary forms of notation as Choreographic Language Agent and the impact of digital technology on contemporary representations of movement in particular motion capture technology and Internet transfer protocols Motion and Representation offers a unique cultural theory of movement and of the ever changing ways of representing movement

and spoken languages can be compared not only as abstract linguistic systems but also at the physical level as dynamically structured articulations. An implication of these studies is that a common basis in gesture can be found for the production perception and neural organization of signed and spoken languages.
