Mound Many Cities Excavated Classic:

Ancient Maya Cities of the Eastern Lowlands Brett A. Houk, 2016-10-05 Brings together for the first time all the major sites of this part of the Maya world and helps us understand how the ancient Maya planned and built their beautiful cities It will become both a handbook and a source of ideas for other archaeologists for years to come George J. Bey III coeditor of *Pottery Economics in Mesoamerica* Skillfully integrates the social histories of urban development Vernon L. Scarborough author of *The Flow of Power Ancient Water Systems and Landscapes* Any scholar interested in urban planning and the built environment will find this book engaging and useful Lisa J. Lucero author of *Water and Ritual* For more than a century researchers have studied Maya ruins and sites like Tikal Palenque Copán and Chichén Itz' have shaped our understanding of the Maya Yet cities of the eastern lowlands of Belize an area that was home to a rich urban tradition that persisted and evolved for almost 2 000 years are treated as peripheral to these great Classic period sites The hot and humid climate and dense forests are inhospitable and make preservation of the ruins difficult but this oft ignored area reveals much about Maya urbanism and culture Using data collected from different sites throughout the lowlands including the Vaca Plateau and the Belize River Valley Brett Houk presents the first synthesis of these unique ruins and discusses methods for mapping and excavating them Considering the sites through the analytical lenses of the built environment and ancient urban planning Houk vividly reconstructs their political history considers how they fit into the larger political landscape of the Classic Maya and examines what they tell us about Maya city building

The Nature of an Ancient Maya City Thomas H. Guderjan, 2007-12-09 Reveals what daily Maya life was like For two millennia the site now known as Blue Creek in northwestern Belize was a Maya community that became an economic and political center that included some 15 000-20 000 people at its height Fairly well protected from human destruction the site offers the full range of city components including monumental ceremonial structures elite and non-elite residences ditched agricultural fields and residential clusters just outside the core Since 1992 a multi-disciplinary multi-national research team has intensively investigated Blue Creek in an integrated study of the dynamic

structure and functional inter relationships among the parts of a single Maya city Documented in coverage by National Geographic Archaeology magazine and a documentary film aired on the Discovery Channel Blue Creek is recognized as a unique site offering the full range of undisturbed architectural construction to reveal the mosaic that was the ancient city Moving beyond the debate of what constitutes a city Guderjan s long term research reveals what daily Maya life was like

Bruce Masse,1980 **Cahokia Mounds** William Iseminger,2010-03-03 About one thousand years ago a phenomenon occurred in a fertile tract of Mississippi River flood plain known today as the American Bottom This phenomenon came to be called Cahokia Mounds America s first city Interpreting the rich heritage of a site like Cahokia Mounds is a balancing act the interpreter must speak as a scholar to the general public on behalf of an entirely different civilization Since even those three groups are splintered into myriad dialects of perspective sometimes it is hard to know what language to use But William Iseminger s work at the site has given him nearly four decades of practice in Cahokia Conversation 101 and he tells the story of the place and its ancient culture as well as its place in contemporary culture with the clarity and confidence of a native speaker Prehispanic Domestic Units in Western Mesoamerica Robert S. Santley,Kenneth G. Hirth,1992-11-23 Prehispanic Domestic Units in Western Mesoamerica presents different analytical approaches for interpreting household composition and cultural site formation processes in prehispanic western Mesoamerica Archaeological data collected using both stratigraphic and reconnaissance methods are combined with and interpreted using a combination of ethnohistoric ethnographic and ethnoarchaeological information The result is a richer and more complete picture of prehispanic household structure than any single analytic approach could produce on its own The book is organized into several sections based on common theme and geographic area The first three chapters provide a broad discussion of conceptual and methodological difficulties that archaeologists must resolve in the study of prehispanic households Subsequent chapters present case studies which examine households from two areas of western Mesoamerica the Central Mexican highlands and the Gulf Coast of Mexico Eight case studies from the Central Mexican highlands provide a longitudinal perspective on changing household composition Four of these examine households during the late Formative Classic Epiclassic and Early Postclassic periods 650 B C A D 1200 while four others focus specifically on household structure during the century immediately preceding the Spanish Conquest Two additional case studies provide comparative information on household organization in the South Gulf Coast region during the Classic period Prehispanic Domestic Units in Western Mesoamerica Studies of the Household Compound and Residence will be an excellent reference for all anthropologists and archaeologists interested in prehispanic western Mesoamerica **The Archaeology of the Kurdistan Region of Iraq and Adjacent Regions** Konstantinos Kopanias,John MacGinnis,2016-06-23 Conference proceedings presenting the first opportunity for leading figures in the burgeoning area of archaeological research in the Kurdish Autonomous Region of Iraq to gather and present all the key new projects which are revolutionising our understanding of the

Sheets, 2014-07-03 Scientists have long speculated on the impact of extreme natural catastrophes on human societies Archeology and Volcanism in Central America provides dramatic evidence of the effects of several volcanic disasters on a major civilization of the Western Hemisphere that of the Maya During the past 2 000 years four volcanic eruptions have taken place in the Zapotitán Valley of southern El Salvador One the devastating eruption of Ilopango around A D 300 forced a major migration pushing the Mayan people north to the Yucatán Peninsula Although later eruptions did not have long range implications for cultural change one of the subsequent eruptions preserved the Cerén site a Mesoamerican Pompeii where the bodies of the villagers the palm thatched roofs of their houses the pots of food in their pantries even the corn plants in their fields were preserved with remarkable fidelity Throughout 1978 a multidisciplinary team of anthropologists archeologists geologists biologists and others sponsored by the University of Colorado's Protoclassic Project researched and excavated the results of volcanism in the Zapotitan Valley a key Mesoamerican site that contemporary political strife has since rendered inaccessible The result is an outstanding contribution to our understanding of the impact of volcanic eruptions on early Mayan civilization These investigations clearly demonstrate that the Maya inhabited this volcanically hazardous valley in order to reap the short term benefits that the volcanic ash produced fertile soil fine clays and obsidian deposits **Early Native Americans** David L.

Landau Eva Lemonnier Dominique Michelet David Ortega Zapata Prudence M Rice Thelma N Sierra Sosa Michael P Smyth Vera Tiesler Eric Weaver *Expanding the View of Hohokam Platform Mounds* Mark D. Elson, 1998-10 For more than a hundred years archaeologists have investigated the function of earthen platform mounds in the American Southwest Built by the Hohokam groups between A D 1150 and 1350 these mounds are among the few monumental structures in the Southwest yet their use and the nature of the groups who built them remain unresolved Mark Elson now takes a fresh look at these monuments and sheds new light on their significance He goes beyond previous studies by examining platform mound function and social group organization through a cross cultural study of historic mound using groups in the Pacific Ocean region South America and the southeastern United States Using this information he develops a number of important new generalizations about how people used mounds Elson then applies these data to the study of a prehistoric settlement system in the eastern Tonto Basin of Arizona that contained five platform mounds He argues that the mounds were used variously as residences and ceremonial facilities by competing descent groups and were an indication of hereditary leadership They were important in group integration and resource management after abandonment they served as ancestral shrines Elson s study provides a fresh approach to an old puzzle and offers new suggestions regarding variability among Hohokam populations Its innovative use of comparative data and analyses enriches our understanding of both Hohokam culture and other ancient societies **Ohio Hopewell Ceramics** Olaf H. Wilcox, 2009-12-01 The Zuni are a Southwestern people whose origins have long intrigued anthropologists This volume presents fresh approaches to that question from both anthropological and traditional perspectives exploring the origins of the tribe and the influences that have affected their way of life Utilizing macro regional approaches it brings together many decades of research in the Zuni and Mogollon areas incorporating archaeological evidence environmental data and linguistic analyses to propose new links among early Southwestern peoples The findings reported here postulate the differentiation of the Zuni language at least 7 000 to 8 000 years ago following the initial peopling of the hemisphere and both formulate and test the hypothesis that many Mogollon populations were Zunian speakers Some of the contributions situate Zuni within the developmental context of Southwestern societies from Paleoindian to Mogollon Others test the Mogollon Zuni hypothesis by searching for contrasts between these and neighboring peoples and tracing these contrasts through macro regional analyses of environments sites pottery basketry and rock art Several studies of late prehistoric and protohistoric settlement systems in the Zuni area then express more cautious views on the Mogollon connection and present insights from Zuni traditional history and cultural geography Two internationally known scholars then critique the essays and the editors present a new research design for pursuing the question of Zuni origins By taking stock and synthesizing what is currently known about the origins of the Zuni language and the development of modern Zuni culture *Zuni Origins* is the only volume to address this subject with such a breadth of data and interpretations It will prove

invaluable to archaeologists working throughout the North American Southwest as well as to others struggling with issues of ethnicity migration incipient agriculture and linguistic origins
