Mount Of Transfiguration Snack For Kids:

Transfiguration Paul Weber, 2001-11-13 This novel destined to be a libertarian classic on the level of *Atlas Shrugged* challenges you to reconsider what you've always known Evolution is an unchallengeable scientific fact isn't it Not in this novel and not in this world either If evolution is a scientific fact wouldn't we have lots of fossils of intermediate life forms by now Take the classic idiocy we were all taught that dolphins and whales are mammals that returned to the sea Really If mammals returned to the sea wouldn't you expect to find at least one fossil of a creature half way between a whale and a land mammal But try to picture what such a poor creature would look like and you realize such a thing couldn't be viable A horse with fins A dolphin with legs Whose kidding whom Species don't change form gradually over time as we were all taught but suddenly dramatically This might happen some day even to our own species What if women the world over started having babies who were different in appearance in abilities and in the way they think Would such a new species be mankind's salvation or mankind's destroyer This is the world of the near future a world in which a great Transfiguration a complete change in life forms has occurred But before I tell you any more about the setting of the novel consider where you learned about how the world works the public schools Did it ever strike you that when children leave the school when a five year old cries and screams at the prospect of leaving home and has to be literally dragged off to school like a lamb to the slaughter that he may be trying to tell you something It may be that children understand the true nature of school much more profoundly than adults For public schools you see are not so much centers of learning as centers of indoctrination The lessons learned in public schools are obedience to authority and subservience to the group Children when they are young resist this with all the rebellion they can muster We as adults accept it But suppose our new humanoid species called the Keth don't think the way most of us do Suppose they resisted all the attempts to indoctrinate them Oh they pretend to go along with submission to authority but at heart they're rebels They develop their abilities they broaden their minds and they wait Like the Keth the Founding Fathers were rebels at heart Unfortunately their ingenious system for restraining tyrants constitutional law has been eroded over time Today were only a crisis away from having full tyranny restored Great thinkers like the founding fathers are rebels in the deepest sense They are the states worst nightmare That nightmare is one in which people understand things as they are stand up and say no The usual reaction to free people saying no is total subjugation as when the South tried to go its own way But usually the state tries to prevent such actions by using a thousand ingenious mind tricks Like Patriotism the unquestioning support for your rulers wishes Or Service to Country the willingness to march off to far corners of the globe to be blown to bits in service to democracy The Keth being gifted in understanding don't fall for such games Not even the most common trick believing you can be better off by accepting stolen loot from the government like a dog panting for a few more scraps from his master The Keth pretend to go along waiting for their chance Most people of course fall for these old games but if you've read this far you're probably one of the rare ones who don't The

story of Transfiguration is the story of breaking free You will read how the Keth are rounded up and sent to specialized schools to make them more pliable and socialized You will read how they struggle to improve their minds despite the efforts of their teachers to hold them back

If I Knew Then What I Know Now John Paciorek,2018-04-19 The joy of first time big league baseball experience is the fulfillment of countless childhood dreams imagining glorified moments of grandeur My first taste of major league fan adulation made me feel good and I wanted more even for just another moment The enthusiasm with which the sportscaster mentioned my name along with details of my first game exploits slowed only after his summation conferred upon me the unofficial major league batting title The 1963 baseball season ended that day and he as well as the entire Colt 45 Organization was looking forward to a brilliant future for this phenomenal rookie and the Organization itself The 1964 spring training began in February and I was anxious to make the team and be in the starting lineup on opening day April 13 in Cincinnati Monday s game would begin at 1 00 PM The lineups were announced and the cards presented to the umpires prior to the first pitch It was without a sudden unexpected sense of disappointment that one prominent name was unobtrusively replaced in the visiting team s lineup It would have been an unconscionable act of omission had the world of dreams maintained its credibility in the unimaginative world of reality It seems that a personally satisfying account not only of what could have been but of what can be is a new prospect only to be explored presently in the mind s incredible realm of imagination I now sense that I always had an inherent right to experience my life story in the way that I wanted it to be I realize that I could have lived with an uncommon understanding that I do create my own reality The future is the only perpetuation of time but now is the constantly new exemption from time s past It seems unfortunate that it should have taken more than fifty years to accrue life s valuable lessons and then find little time remaining to take advantage of the wisdom that would have been found to give most beneficial service to the days of youth If I knew then what I know now what could have been Suddenly a thought occurred to me How and why is all this knowledge and the understanding and application of it coming into my human experience I seem so far advanced of the times in this year of 1964
