True Tales of Mountain Adventures: For Non-Climbers Young and Old Aubrey Mrs. Le Blond, 2022-09-15 True Tales of Mountain Adventures For Non Climbers Young and Old is a book by Aubrey Le Blond Le Blond was an Irish pioneer of mountaineering author and nature photographer here describing mountaineering life in detail Excerpt Mountaineering makes a person quick in learning how to act in moments of danger It cultivates his presence of mind it teaches him to be unselfish and thoughtful for others who may be with him It takes him amongst the grandest scenery in the world it shows him the forces of nature let loose in the blinding snow storm or the roaring avalanche It lifts him above all the petty friction of daily life and takes him where the atmosphere is always pure and the outlook calm and wide It brings him health and leaves him delightful recollections It gives him friends both amongst his fellow climbers and in the faithful guides who season after season accompany him

True Tales of Mountain Adventures For Non-Climbers Young and Old Mrs. Aubrey le Blond, 2020-09-28 Mountaineering is not merely walking up hill It is the art of getting safely up and down a peak where there is no path and where steps may have to be cut in the ice it is the art of selecting the best line of ascent under conditions which vary from day to day Mountaineering as a science took long to perfect It is more than a century since the first ascent of a big Alpine peak was accomplished and the early climbers had but little idea of the dangers which they were likely to meet with They could not tell when the snow was safe or when it might slip away in an avalanche They did not know where stones would be likely to fall on them or when they were walking over one of those huge cracks in the glacier known as crevasses and lightly bridged over with winter snow which might break away when they trod on it However they soon learnt that it was safer for two or more people to be together in such places than for a man to go alone and when crossing glaciers they used the long sticks they carried as a sort of hand rail a man holding on to each end so that if one tumbled into a hole the other could pull him out Of course this was a very clumsy way of doing things and before long it occurred to them that a much better plan would be to use a rope and being all tied to it about 20 feet apart their hands were left free and the party could go across a snow field and venture on bridged over crevasses in safety At first both guides and travellers carried long sticks called alpenstocks If they came to a steep slope of hard snow or ice they hacked steps up it with small axes which they carried slung on their backs This was a very inconvenient way of going to work as it entailed holding the alpenstock in one hand and using the axe with the other So they thought of a better plan and had the alpenstock made thicker and shorter and fastened an axe head to the top of it This was gradually improved till it became the ice axe as used to day and as shown in

many of my photographs This ice axe is useful for various purposes besides cutting steps If you dig in the head while crossing a snow slope it acts as an anchor and gives tremendous hold while to allude to its functions as a tin opener a weapon of defence against irate bulls on Alpine pastures or as a means for rapidly passing through a crowd at a railway station is but to touch on a very few of its admirable qualities **Prairie and Rocky Mountain Adventures** John C.
