Robert Iger CEO Disney A compelling vision of where the internet should go and how to get there Sam Altman co founder

fostering creativity and entrepreneurship doesn't have to die and can in fact be saved with blockchain networks He separates
this movement which aims to provide a solid foundation for everything from social networks to artificial intelligence to virtual
worlds from cryptocurrency speculation a distinction he calls the computer vs the casino With lucid and compelling prose
drawing from a twenty five year career in the software industry Dixon shows how the internet has undergone three distinct
eras bringing us to the critical moment we're in today The first was the read era in which early networks democratized
information In the read write era corporate networks democratized publishing We are now in the midst of the read write own
era sometimes called web3 in which blockchain networks are granting power and economic benefits to communities of users
not just corporations Read Write Own is a must read for anyone internet users business leaders creators entrepreneurs who
wants to understand where we've been and where we're going It provides a vision for a better internet and a playbook to
