Social Psychology in Action Kai Sassenberg,Michael L.W. Vliek,2019-07-01 This timely and applied

textbook brings together leading scientists to illustrate how key theories and concepts in social psychology help to predict and explain behavior and can be successfully applied to benefit social and practical problems. It focuses on robust theories and models known for their successful applications and covers a diverse range of settings spanning classroom interventions, health behavior, financial decision making, climate change, and much more. Each chapter comprises of a theoretical section to define the key concepts and summarize the theory, providing evidence for its reliability and limitations from basic research as well as an application section that summarizes research in an applied context and provides details about a particular study including the respective application setting. The textbook expertly shows how theory can make meaningful predictions for real world contexts and isn't afraid to explain the potential hurdles and pitfalls when applying a theory and its underlying set of concepts in a certain context. Crucially, this format moves towards theory testing in applied contexts, enabling a closer examination of why and under what circumstances interventions may be successful in obtaining a desired behavioral or psychological end state. Among the topics explored: Mindset, theory of action phases and if-then planning, Quality of motivation in self-determination theory, The focus theory of normative conduct, Social identity theory and intergroup contact theory, Intergroup forgiveness. Social Psychology in Action is a critical resource for advanced undergraduate and graduate students in social and cultural psychology as well as students of behavioral economics seeking to develop a deeper understanding of major theories and applications of the fields. Practitioners working in the areas of organizational behavior and management, health, communication, social work, and educational science and pedagogy will also find the volume pertinent to their work.
