Netflix's Speculative Fictions Colin Jon Mark Crawford, 2020-12-10 Netflix's Speculative Fictions Financializing Platform Television argues that Netflix's scaled expansion has hinged upon its ability not only to create but more importantly to communicate new forms and flows of potential value in platform capitalism wherein capital is mobilized not only from direct revenue streams but also the new value assigned to inputs and investments of data debt attention behavior taste time sociality and speculation To interpret and critique these new communications and projections of value Colin Jon Mark Crawford performs a discursive analysis of the platform television industry leader Netflix and its investor lore the multi-sited narrative of value found in the company's investor relations materials and corporate communications such as letters to shareholders financial earnings reports executive interviews press releases and blog posts Netflix best represents the increasingly ubiquitous nexus of culture tech and finance industries that is platform television To better understand the emergent financial logics of this relatively new media industry we must first understand the speculative narratives and discourses of value which organize it Scholars of media studies television studies technology studies and economics will find this book particularly useful

Analyzing Financial Data and Implementing Financial Models Using R Clifford S. Ang, 2015-04-06 This book is a comprehensive introduction to financial modeling that teaches advanced undergraduate and graduate students in finance and economics how to use R to analyze financial data and implement financial models This text will show students how to obtain publicly available data manipulate such data implement the models and generate typical output expected for a particular analysis This text aims to overcome several common obstacles in teaching financial modeling First most texts do not provide students with enough information to allow them to implement models from start to finish In this book we walk through each step in relatively more detail and show intermediate R output to help students make sure they are implementing the analyses correctly Second most books deal with sanitized or clean data that have been organized to suit a particular analysis Consequently many students do not know how to deal with real world data or know how to apply simple data manipulation techniques to get the real world data into a usable form This book will expose students to the notion of data checking and make them aware of problems that exist when using real world data Third most classes or texts use expensive commercial software or toolboxes In this text we use R to analyze financial data and implement models R and the accompanying packages used in the text are freely available therefore any code or models we implement do not require any additional expenditure on the part of the student Demonstrating rigorous techniques applied to real world data this text covers a wide spectrum of timely and practical issues in financial modeling including return and risk measurement portfolio management options pricing and fixed income analysis

Media Today Joseph Turow, 2011-09-22 Media Today puts students at the center of the profound changes in the twenty-first century media world from digital convergence to media ownership and gives them the skills to think critically about what these changes mean for the role of media in their lives Media Today

Fourth Edition is built around four key concepts A media systems approach allows students to understand the interconnected cultural political and economic forces that shape media they encounter every day Unique insights into media trends give students an insider's perspective on how media industries are responding to changes from globalization to social networking Focus on digital convergence shows in each chapter how digital media is transforming traditional mass media such as newspapers magazines and television A media literacy goal encourages and builds critical skills to make students more informed and engaged citizens in our media driven society Completely revised with updated examples new case studies and new online video resources the 4th edition of Media Today connects the latest trends debates and technologies to the history of media highlighting the impact and meaning of today's changes to the media landscape especially how traditional industries have blurred together with digital convergence Additional learning resources including a new set of online video resources interactive quizzes study resources and instructor guides are available on the free companion website at www.routledge.com/textbooks/mediatoday4e

Secrets of the Moneylab Kay-Yut Chen, Marina Krakovsky, 2010-09-02 Taking the findings of behavioral economics from the cocktail party to the boardroom Experimental economist Kay Yut Chen leads an economics lab at Hewlett Packard the first of its kind at any company His groundbreaking research into human behavior has turned into tangible results for HP He has saved the company millions of dollars simply by

explaining why people really do the things they do MoneyLab offers practical lessons being put to use right now at HP and other leading companies It explains for instance how to Use incentives to influence employees suppliers and buyers Determine whom to trust and how much Reduce the negative effects of irrational behavior by noticing patterns that don't seem logical Take advantage of the human tendency to game the system In the spirit of Predictably Irrational but with a more practical approach Chen shows how to translate the findings of behavioral economics into concrete actions to achieve new levels of success

The Fish In The Room M. Eweed, 2025-11-03 You built the killer case flawless logic sexy data slides that could win a corporate beauty pageant And what happened Your customer picked your competitor Or your boss chose his own recycled dusty idea from 2019 Then They explained it with the dumbest reasons you've ever heard So of course you thought I was two seconds away from calling them complete idiots But here's the twist they weren't being stupid they just ordered for themselves and your dish wasn't on the menu This isn't a normal business book It's what happens when you take behavioral science neuroscience psychology and real business strategy and put them together to answer one simple question how do you actually make people say yes and take action And it's not theory or jargon it's explained with real situations you already know you your boss your customers that colleague whose bad ideas keep getting approved and the real moves entrepreneurs used to turn small ideas into companies everyone now thinks were always going to succeed Because here's the problem what they taught you in business school was expensive fiction Every MBA program every management textbook every consultant deck tells the same fairytale about decision making people spot a problem gather information weigh alternatives and then pick the optimal solution It sounds scientific It sounds professional But it's fantasy Real life doesn't work like that This book speaks neuroscience not business school fiction Your brain actually has two systems making decisions The first is the emotional side your ancient survival processor that's been keeping humans alive for millions of years It's insanely fast reacts in milliseconds and it operates completely outside your awareness It doesn't talk it doesn't do logic it just fires gut reactions based on feelings The second is the analytical side your slow deliberate articulate processor That's the voice in your head that sounds smart and professional It loves weighing options building arguments and writing long explanations for choices you already made Same brain two operating systems So picture it like this a giant ancient fish silent moving toward warm water away from danger following the group that's your emotional system Pure instinct Then picture a well dressed general articulate strategic making plans calculating incentives presenting frameworks speaking in full sentences about optimal outcomes That's your analytical system This whole book is your invitation to accept one uncomfortable truth humans don't buy spreadsheets And by spreadsheets I mean logic evidence numbers data all the rational firepower you thought would finally make them say yes Most of the time it doesn't Not your calculation Not your competitive matrix Not that slide deck you redesigned seventeen times Because what actually decides is the fish not the general So here's what's coming where behavioral economics and psychology finally meet Monday morning business decisions Turn the page and you'll see why your

last pitch really failed and why it had nothing to do with the quality of your logic
