Reading Comprehension Assisting Children with Learning Difficulties examines the complex nature of reading comprehension It introduces a model for classifying reading comprehension based on an expanded Simple View of Reading Issues related to assessment diagnosis and remediation of reading comprehension difficulties are discussed and translated into clear recommendations to inform reading intervention design and practice It gives an informed understanding as to why reading comprehension is difficult for some children with learning disabilities such as ADHD autism language difficulties and dyslexia From leading literacy research the book develops a deeper understanding of thinking processes that facilitate comprehension at the word discourse and metacognitive levels Children will benefit from the introduction of evidence based methods for teaching reading comprehension using structured multiple strategy frameworks Language Acquisition By Eye Charlene Chamberlain, Jill P. Morford, Rachel I. Mayberry, 1999-08-01 This book focuses on the early acquisition of signed languages and the later development of reading by children who use signed languages It represents the first collection of research papers focused solely on the acquisition of various signed languages by very young children all of whom are acquiring signed languages natively from deaf parents It is also the first collection to investigate the possible relationships between the acquisition of signed language and reading development in school aged children The underlying questions addressed by the chapters are how visual gestural languages develop and whether and how visual languages can serve the foundation for learning a second visual representation of language namely reading Language Acquisition by Eye is divided into two parts anchored in the toddler phase and the school pupil phase The central focus of Part I is on the earliest stages of signed language acquisition The chapters in this part address important questions as to what babytalk looks like in signed language and the effect it has on babies attention what early babbling looks like in signed language what babies earliest signs look like how parents talk to their babies in signed language to ensure that their babies see what s being said and what the earliest sentences in signed languages tell us about the acquisition of grammar With contrasting research paradigms these chapters all show the degree to which parents and babies are highly sensitive to one another s communicative interactions in subtle and complex ways Such observations cannot be made for spoken language acquisition because speech

does not require that the parent and child look at each other during communication whereas signed language does Part II focuses on the relationship between signed language acquisition and reading development in children who are deaf All of these chapters report original research that investigates and uncovers a positive relationship between the acquisition and knowledge of signed language and the development of reading skills and as a result represents a historical first in reading research This section discusses how current theory applies to the case of deaf children s reading and presents new data that illuminates reading theory Using a variety of research paradigms each chapter finds a positive rather than a negative correlation between signed language knowledge and usage and the development of reading skill These chapters are sure to provide the foundation for new directions in reading research

Reading Comprehension Difficulties Cesare

Cornoldi, Jane V. Oakhill, 2013-04-03 Recognizing the characteristics of children with learning disabilities and deciding how to help them is a problem faced by schools all over the world Although some disorders are fairly easily recognizable e g mental retardation or very specific to single components of performance and quite rare e g developmental dyscalculia schools must consider much larger populations of children with learning difficulties who cannot always be readily classified These children present high level learning difficulties that affect their performance on a variety of school tasks but the underlying problem is often their difficulty in understanding written text In many instances despite good intellectual abilities and a superficial ability to cope with written texts and to use language appropriately some children do not seem to grasp the most important elements or cannot find the pieces of information they are looking for Sometimes these difficulties are not immediately detected by the teacher in the early school years They may be hidden because the most obvious early indicators of reading progress in the teacher s eyes do not involve comprehension of written texts or because the first texts a child encounters are quite simple and reflect only the difficulty level of the oral messages sentences short stories etc with which the child is already familiar However as years go by and texts get more complex comprehension difficulties will become increasingly apparent and increasingly detrimental to effective school learning In turn studying assimilating new information and many other situations requiring text comprehension from problem solving to reasoning with linguistic contents could be affected Problems with decoding dyslexia and language disorders have attracted more interest from researchers than have specific comprehension problems and have occupied more room in specialized journals Normal reading comprehension has also been a favorite with researchers However scarce interest has been paid to subjects who have comprehension difficulties This book is an attempt to remedy this situation In so doing this volume answers the following questions Does a reading comprehension problem exist in schools How important and widespread is the problem Is the problem specific How can a reading comprehension difficulty be defined and identified Does the syndrome have a single pattern or can different subtypes be identified What are the main characteristics associated with a reading comprehension difficulty When can other well identified problems add to our understanding of reading comprehension difficulties Which educational strategies are

effective in preventing and treating reading comprehension difficulties What supplementary information can we get from an international perspective

Simplified Signs: A Manual Sign-Communication System for Special Populations, Volume 1. John D. Bonvillian,Nicole Kissane Lee,Tracy T. Dooley,Filip T. Loncke,2020-07-30 Simplified Signs presents a

system of manual sign communication intended for special populations who have had limited success mastering spoken or full sign languages It is the culmination of over twenty years of research and development by the authors The Simplified Sign System has been developed and tested for ease of sign comprehension memorization and formation by limiting the complexity of the motor skills required to form each sign and by ensuring that each sign visually resembles the meaning it conveys Volume 1 outlines the research underpinning and informing the project and places the Simplified Sign System in a wider context of sign usage historically and by different populations Volume 2 presents the lexicon of signs totalling approximately 1000 signs each with a clear illustration and a written description of how the sign is formed as well as a memory aid that connects the sign visually to the meaning that it conveys While the Simplified Sign System originally was developed to meet the needs of persons with intellectual disabilities cerebral palsy autism or aphasia it may also assist the communication needs of a wider audience such as healthcare professionals aid workers military personnel travellers or parents and children who have not yet mastered spoken language The system also has been shown to enhance learning for individuals studying a foreign language Lucid and comprehensive this work constitutes a valuable resource that will enhance the communicative interactions of many different people and will be of great interest to researchers and educators alike
