The Metabolic Syndrome and Obesity George A. Bray, 2008-01-23 Thirty years ago I published my first monograph on obesity Bray 1976 Many things have changed in these 30 years but many have remained the same Preparation of The Metabolic Syndrome and Obesity has given me a chance to survey the changes to the field and to present an update of the scientific information In retrospect I conclude that a major component of the current epidemic of overweight is not medical not genetic not psychological and will not be effectively treated by lifestyle changes that require individual choices We are all influenced by the prices of the goods we buy With the reduction in food prices and distortion of commercially profitable products resulting from federal subsidies of corn sugar and rice the food industry has been able to produce cheap good tasting energy dense foods and can sell them cheaply in large portion sizes In contrast foods like fruits and vegetables receive little in the way of subsidies and are thus more expensive thus we buy less Providing more healthy food alternatives as some advocate will put items with higher costs on the shelves and is in my view unlikely to alter consumer choices as long as good tasting energy dense foods remain cheap HISTORICAL CONTEXT FOR OBESITY Obesity was already a problem before my first monograph was published Between the writing of that monograph and The Metabolic Syndrome and Obesity I was fortunate enough to find a short book in French written by an American from Cincinnati named Worthington
