Artificial Intelligence and Society 5.0 Vikas Khullar, Vrajesh Sharma, Mohit Angurala, Nipun Chhabra, 2024-01-22 The artificial intelligence based framework algorithms and applications presented in this book take the perspective of Society 5.0 a social order supported by innovation in data information and knowledge It showcases current case studies of Society 5.0 in diverse areas such as healthcare smart cities and infrastructure Key Features Elaborates on the use of big data cyber physical systems robotics augmented virtual reality and cybersecurity as pillars for Society 5.0 Showcases the use of artificial intelligence architecture frameworks and distributed and federated learning structures in Society 5.0 Discusses speech recognition image classification robotic process automation natural language generation and decision support automation Elucidates the application of machine learning deep learning fuzzy based systems and natural language processing Includes case studies on the application of Society 5.0 aspects in educational medical infrastructure and smart cities The book is intended especially for graduate and

postgraduate students and academic researchers in the fields of computer science and engineering electrical engineering and information technology **Sensor-Based Activity Recognition and Artificial Intelligence** Orhan Konak, Bert Arnrich, Gerald Bieber, Arjan Kuijper, Sebastian Fudickar, 2025-02-08 This book constitutes the proceedings of the 9th International Workshop on Sensor Based Activity Recognition and Artificial Intelligence iWOAR 2024 held in Potsdam Germany during September 26 27 2024 The 15 full papers and 4 short papers presented here were carefully reviewed and selected from 28 submissions These papers have been categorized into the following topical sections Advances in Human Activity Recognition Applications in Vision Based Recognition Wearable Devices and Health Monitoring Novel AI and Machine Learning Approaches Short Papers Emerging Topics in Sensor Based Systems **Pattern Recognition. ICPR 2024 International Workshops and Challenges** Shivakumara Palaiahnakote, Stephanie Schuckers, Jean-Marc Ogier, Prabir Bhattacharya, Umapada Pal, Saumik Bhattacharya, 2025-04-24 This 6 volume set LNCS 15614 15619 constitutes the proceedings of the ICPR 2024 International Workshops and Challenges held under the umbrella of the 27th International Conference on Pattern Recognition ICPR 2024 which took place in Kolkata India during December 1 5 2024 The 183 full papers presented in these 6 volumes were carefully reviewed and selected from numerous submissions The 21 ICPR 2024 workshops addressed problems in pattern recognition artificial intelligence computer vision and image and sound analysis and the contributions reflect the most recent applications related to healthcare biometrics ethics multimodality cultural heritage imagery affective computing and de escalation **Navigating Imaginary Worlds** Mark J.P. Wolf, 2025-06-16 This edited anthology offers a collection of essays that each look at various types of wayfinding Together they explore a variety of wayfinding tools and techniques and their applications as well as ways of keeping track of the construction of worlds too With transmedial worlds extending over multiple media multiple authors and sometimes even multiple decades of creation a wealth of different issues can arise worlds need to direct audience members into how to organize them conceptually Edited by Mark J P Wolf and featuring contributions from a distinguished set of authors from interdisciplinary backgrounds this book enriches the theory history and practice of world building through the exploration of navigation The essays have many overlapping concerns and together they provide the reader with a range of discussions regarding wayfinding and the many ways it intersects with world building and world experiencing activities Thus rather than just analyzing worlds themselves the anthology also asks the reader to consider analyzing the act of world building itself This collection will be of interest to students and scholars in a variety of fields including Subcreation Studies Transmedia Studies Popular Culture Comparative Media Studies Video Game Studies Film Studies and Interdisciplinary Literary Studies **Multimedia Forensics** Husrev Taha Sencar, Luisa Verdoliva, Nasir Memon, 2022-04-02 This book is open access Media forensics has never been more relevant to societal life Not only media content represents an ever increasing share of the data traveling on the net and the preferred communications means for most users it has also become integral part of most innovative applications in the digital

information ecosystem that serves various sectors of society from the entertainment to journalism to politics Undoubtedly the advances in deep learning and computational imaging contributed significantly to this outcome The underlying technologies that drive this trend however also pose a profound challenge in establishing trust in what we see hear and read and make media content the preferred target of malicious attacks In this new threat landscape powered by innovative imaging technologies and sophisticated tools based on autoencoders and generative adversarial networks this book fills an important gap It presents a comprehensive review of state of the art forensics capabilities that relate to media attribution integrity and authenticity verification and counter forensics Its content is developed to provide practitioners researchers photo and video enthusiasts and students a holistic view of the field

Sustainable Smart Cities and Territories Juan M. Corchado, Saber Trabelsi, 2021-07-30 This book constitutes the proceedings of this year's Sustainable Smart Cities and Territories International Conference SSCt 2021 held in Doha Qatar from the 27th to the 29th of April 2021 The SSCt 2021 is an open symposium that brings together researchers and developers from academia and industry to present and discuss the latest scientific and technical advances in the fields of Smart Cities and Smart Territories It promotes an environment for discussion on how techniques methods and tools help system designers accomplish the transition from the current cities towards those we need in a changing world The program includes keynote abstracts a main technical track two workshops and a doctoral consortium The symposium is organized by the Texas A M University at Qatar We would like to thank all the contributing authors the members of the Local Committee Scientific Committee Organizing Committee and the sponsors Texas A M University of Qatar AIR Institute and the IoT Digital Innovation Hub for their hard work and dedication

Advanced Sensors for Smart Healthcare Tuan Anh Nguyen, 2025-01-27 Advanced Sensors for Smart Healthcare provides an invaluable resource for researchers and healthcare practitioners who are eager to use technology to improve the lives of patients Sections highlight data from sensor networks via the smart hospital framework including data insights and access This book shows how the use of sensors to gather data on a patient's condition and the environment their care takes place in can allow healthcare professionals to monitor well being and make informed decisions about treatment Describes the fundamentals of sensors biosensors and smart hospitals Explains how sensors and implanted nanodevices can be used in smart healthcare Discusses how intelligent wireless medical sensor networks can be used for healthcare in the future Companion volume to Sensor Networks for Smart Hospitals

Machine Learning and Metaheuristic Computation Erik Cuevas, Jorge Galvez, Omar Avalos, Fernando Wario, 2024-12-24 Learn to bridge the gap between machine learning and metaheuristic methods to solve problems in optimization approaches Few areas of technology have greater potential to revolutionize the globe than artificial intelligence

Two key areas of artificial intelligence machine learning and metaheuristic computation have an enormous range of individual and combined applications in computer science and technology To date these two complementary paradigms have not always been treated together despite the potential of a combined approach which maximizes the utility and minimizes the drawbacks of both Machine Learning and Metaheuristic Computation offers an introduction to both of these approaches and their joint applications Both a reference text and a course it is built around the popular Python programming language to maximize utility It guides the reader gradually from an initial understanding of these crucial methods to an advanced understanding of cutting edge artificial intelligence tools The text also provides Treatment suitable for readers with only basic mathematical training Detailed discussion of topics including dimensionality reduction clustering methods differential evolution and more A rigorous but accessible vision of machine learning algorithms and the most popular approaches of metaheuristic optimization Machine Learning and Metaheuristic Computation is ideal for students researchers and professionals looking to combine these vital methods to solve problems in optimization approaches

Nano-Engineering at Functional Interfaces for Multidisciplinary Applications Sai Sathish Ramamurthy, Seemesh Bhaskar, Narendra Reddy, 2024-10-18 Nano Engineering at Functional Interfaces for Multi disciplinary Applications Electrochemistry Photoplasmonics Antimicrobials and Anticancer Applications provides a comprehensive overview of the fundamentals and latest advances of nano engineering strategies for the design development and fabrication of novel nanostructures for different applications in the fields of photoplasmonics and electrochemistry as well as antibacterial and anticancer research areas The book begins with an introduction to the fundamentals and characteristics of nanostructured interfaces and their associated technologies including an overview of their potential applications in different fields The following chapters present a thorough discussion of the synthesis processing and characterization methods of nanomaterials with unique functionalities suitable for energy harvesting food and textile applications electrocatalysis biomedical applications and more It then concludes outlining research future directions and potential industrial applications Presents the advantages and impact of nano engineering in technological advances with up to date discussions on their applications Covers research directions and potential future applications of nano engineering in industry Includes case studies that illustrate important processes
