

Reading Comprehension

Read the short passage and answer the questions.

The Dog and the Shadow

It happened that a Dog had got a piece of meat and was carrying it home in his mouth to eat it in peace. Now on his way home, he had to cross a plank lying across a running brook. As he crossed, he looked down and saw his own shadow reflected in the water beneath. Thinking it was another dog with another piece of meat, he made up his mind to have that also. So he made a snap at the shadow in the water, but as he opened his mouth the piece of meat fell out, dropped into the water and was never seen more.

1. What animal was crossing a board?

2. What did the dog have in his mouth?

3. What did the dog see in the running brook?

4. What is the moral of the story?

Fluency and Reading Comprehension in Typical Readers and Dyslexics Readers Simone A. Capellini, Giseli D. Germano, 2018-02-22 Reading involves decoding and

comprehension components and to become efficient it requires a large number of cognitive and linguistic processes. Among those the phonological awareness, the alphabetic principle, the decoding, the fluency, the lexical development and the text comprehension development. The reading comprehension is strongly related with the development of vocabulary, oral language, linguistic skills, memory skills and ability to make inferences and the world experiences of each individual. These processes become important only when the professional needs to deal with students presenting difficulties in learning how to read. The difficulty using the knowledge of conversion rules between grapheme and phoneme to the word reading construction characterizes the dyslexia, which is a specific learning disorder with a neurological source. These difficulties presented by students with dyslexia interfere in their learning process, impairing the learning development. Knowing and following the reading development and its processes as well as obtaining the punctuation of fluency abilities and students comprehension allow us to understand what happens when the student presents difficulties to read. This could help in the identification of learning disabilities and in the development of intervention programs.

Current Directions in Dyslexia Research Dirk J. Bakker, Kees P. van den Bos, David L. Share, Linda S. Siegel, 2020-12-18. This book covers research on biopsychological aspects of dyslexia, reflects on psycholinguistic aspects of dyslexia, offers reflections on dyslexia treatment research in general. It points out that in some dyslexics it is not sufficient to treat word identification difficulties alone.
