Ai Tools Act Practice Compare:

Transformative AI Practices for Personalized Learning Strategies Kyei-Blankson, Lydia, Ntuli, Esther, 2025-04-24 AI revolutionizes education and transforms learning strategies catered to students' personal needs. Through adaptive learning algorithms and intelligent tutoring systems, AI enhances the educational experience by customizing content and increasing the speed at which each student can learn based on their individual strengths and challenges. This approach improves engagement and knowledge retention while fostering diverse learning styles. As AI evolves its role in education, it promises to create more dynamic, inclusive, and effective learning environments for the future. *Transformative AI Practices for Personalized Learning Strategies* explores how AI is rapidly transforming into a necessary tool in the field of education. It examines best practices for integrating AI tools into teaching and presents examples from different educational settings, demonstrating successful usage of AI tools. This book covers topics such as education technologies, artificial intelligence, and ethics and law, and is a useful resource for educators, academicians, researchers, engineers, and scientists. *Research Handbook on the Law of Artificial Intelligence* Woodrow Barfield, Ugo Pagallo, 2025-06-09 This second edition provides a broad range of perspectives on the legal implications of artificial intelligence (AI) across different global jurisdictions. Contributors identify the potential threats that AI poses to the protection of rights and human wellbeing, anticipating future developments in technological and legal infrastructures. [Internet of Things, Artificial Intelligence and Blockchain Technology](#) R. Lakshmana Kumar, Yichuan Wang, T. Poongodi, Agbotiname Lucky Imoize, 2021-09-02 This book explores the concepts and techniques of IoT, AI, and blockchain. Also discussed is the possibility of applying blockchain for providing security in various domains. The specific highlight of this book is focused on the application of integrated technologies in enhancing data models, better insights, and discovery, intelligent predictions, smarter finance, smart retail, global verification, transparent governance, and innovative audit systems. The book allows both practitioners and researchers to share their opinions and recent research in the convergence of these technologies among academicians and industry people. The contributors present their technical evaluation and compare it with existing technologies. Theoretical explanation and experimental case studies related to real-time scenarios are also included. This book pertains to IT professionals, researchers, and academicians working on fourth revolution technologies. *Artificial Intelligence in Physiotherapy and Allied Health: Leveraging Education* Dr. Ranjeet Singha, 2025-10-26 *Artificial Intelligence in Physiotherapy and Allied Health Volume 1* is a practical, research-aligned guide that empowers students to study smarter, think critically, ethically, and perform confidently in academics, viva practical exams, and job interviews. Focused on Physiotherapy and Allied Health learners, this book demonstrates how to use AI responsibly and effectively, backed by evidence-based educational strategies and real-world applicability. Artificial Intelligence in Vocational Education and Training Selena Chan, 2025-05-30 This book details a series of studies across several levels of learning and vocational education and training VET discipline areas In the main the advent of natural language AI chatbots exemplified by ChatGPT has caused the educational sector to take on a defensive stance Both schools and the higher education sector are engaged in an on going arms race to prevent learners from using AI to augment assessments Therefore there has been a focus on plagiarism prevention rather than to better understand the potentialities for utilizing AI to support better learning This book explores the collaborative development and planning between educational developers learning designers and teachers to design learning activities which could leverage off various artificial intelligence AI platforms In doing support is provided for effective learning to be undertaken with an emphasis on the learning and application of critical thinking skills The studies presented through the volume describe the integration of AI literacy to support learners in evaluating the relevance and efficacy of AI tools and platforms and to understand how to best utilize these for specific purposes This book also synthesizes a framework for the introduction selection and implementation of AI into the VET curriculum It showcases recommendations and guidelines to inform the future integration of AI tools platforms into the VET curriculum

Activating Academia for an Era of Colliding Crises Alison Julia Katherine Green, Adam R. Aron, James Dyke, 2025-10-28 While there has been discussion for decades about the need to rethink the core purpose of academia to enable all to live well on a planet of finite resources humanity's present predicaments point to a paradox at the heart of the academic enterprise Although academic institutions have originated research and innovations that underpin much of what we view as development and progress

these same advances are also responsible for the global crises we now face Indeed many voices are now arguing that academia can and must do more to drive the transformative change that is needed if we are to avert the imminent catastrophe that is almost upon us The Alliance for Sustainability leadership in Education EAUC in conjunction with Second Nature and the United Nations Environment's Youth and Education Alliance announced in 2019 that over 7 000 higher and further education institutions across six continents were declaring a climate emergency with a three point plan for action as part of the Race to Zero This enshrined a bolder commitment from academia to play its part in achieving net zero greenhouse gas emissions While there has been success over several decades in fostering Education for Sustainable Development ESD and in embedding sustainability in curricula the efficacy of this has arguably been limited by the disciplinary silos in which academics find themselves Similarly the research and scholarly work that is needed to fully understand planetary limits transcends the traditional silos of academic disciplines This Research Topic then will examine what needs to change to optimise ESD and transdisciplinary approaches to research and teaching It will explore ways in which theories of change can be brought to bear on these issues Our Research Topic also centres on the responsibility acknowledged increasingly by academics for academic institutions and sectors and for academics themselves to do more As trusted educators communicators and policy influencers academia has unique potential and responsibility to guide students and society through this transition to a better future In the case of many academics this means embracing advocacy and activism as their moral responsibility at this point in humanity's history To this end the Research Topic will consider ways in which climate justice principles may be used to explore the responsibilities of academic institutions as one example of an actor with the capacity to influence the drivers of climate breakdown to act In some nations academic institutions have fallen prey to a set of neoliberal assumptions that have arguably diminished the agency of individual academics The marketisation of higher education is rife in some nations e g UK and US and while some academics have documented rising inequality a deepening climate and ecological crisis socio economic breakdown and the deteriorating psychological and physical well being these engender they have so far proven mostly powerless to reorient their fields to confront these challenges at the institutional level Consequently they remain unable to pursue an agenda for change that benefits their students and wider society This Research Topic welcomes research that explores actions available to academics from diverse perspectives including models of behavioural change Decades of research have shown that warnings do not work and that evidence based recommendations do not necessarily translate into policy or institutional change Academics increasingly refer to a broken science society contract suggesting that calls to listen to the science and expectations that warnings issued by scientists will be heeded reflect a depoliticized view of the relationships between science and society This failure to recognise the intricate ways in which science and policy are connected raises questions about the neutrality of research and the academic enterprise Our Research Topic invites articles that explore how we might re make the science society contract Questions about the

independence and interdependence of research and teaching inevitably arise when academic institutions are in receipt of funds from corporations charities foundations and individuals Institutions can be compromised by vested interests often in the form of corporate interests that can influence research curriculum and staff appointments and the will of senior management to address this problem is poor While there are laudable initiatives aimed at resolving intersecting challenges and promoting transdisciplinary approaches in higher education it is fair to say that increasing numbers of academics globally realise that we are not set up to ready society for an era of colliding environmental and social crises Many fear that academia is guilty of perpetuating the problems that have created this crisis And while growing numbers hold this view few have ready answers as to what more academics and academic institutions can do In spite of this some academics have chosen to step outside of their conventional roles embracing advocacy and activism either taking individual action outside of their role or seeking to drive change within their institutions One problem is that action is fragmented often reliant upon the energies and tenacity of one or more individuals who have sought to re define their roles to embrace the responsibility they feel to act The Research Topic will serve to aggregate work on academic activism and to raise awareness of ways in which academics can act It will also examine the notion that we need to remake the science society contract and will explore what that entails The Research Topic will explore the interrelations between science and society and highlight the need to examine political dimensions of decision making and knowledge production To begin to provide answers to the questions of what it is that academics can do to drive transformational change this Research Topic brings together voices from diverse disciplines and nations Their voices have in common one thing each has reflected on or re imagined their role and purpose as an academic and each has embraced advocacy or activism The articles will be organised around three broad themes i In what ways are our academic institutions either failing or succeeding We invite articles that expose the overt and covert influences on academia such as neoliberal structures and fossil fueled research agendas We also invite articles centred on examples of good practice such as initiatives to foster transdisciplinary approaches to research and education ii Trailblazers for transformative change We invite case studies and critiques from the front lines from academics exploring and putting into practice their own take on What can I do Evaluations of what has and has not worked to drive change at the institutional and individual levels are welcomed iii The disruptors that are already initiating transformations in HE The growth of for profit private providers open access teaching resources and other online approaches that threaten the business models of existing public and nonprofit institutions who struggle to compete with the relevance and just in time education that is becoming available via novel actors We welcome articles exploring the potential for disruption

Global Perspectives and Emerging Issues in Comparative Law Joshua Aston, Aditya Tomer, Rupendra Singh, 2025-08-29. This book is an essential resource for legal scholars, practitioners and policymakers seeking a deeper understanding of how legal systems interact and evolve in an increasingly interconnected world. It provides a comparative analysis of key legal domains, exploring contemporary challenges such as digital governance, climate justice, intellectual property and human rights. Featuring contributions from leading international experts, the book offers a nuanced examination of how different legal traditions respond to emerging global issues. It delves into the interplay between common law and civil law jurisdictions, the impact of international treaties and the role of technology in shaping legal norms. Designed for both academic and professional audiences, this book serves as a vital reference for those engaged in legal research, cross border litigation or international policy making. With real world case studies and interdisciplinary insights, it is an indispensable guide to navigating the complexities of modern law.

Legal pedagogy, practice and curriculum transformation: What does the future hold and look like? Charles Maimela, 2025-07-18. In an era marked by rapid technological innovation and complex socio-political shifts, legal education stands at a critical crossroads. This timely publication explores the imperative for a curriculum that is both responsive and resilient, capable of adapting to the evolving needs of students, institutions and society at large. Blending theoretical analysis with practical insight, the book offers forward-thinking strategies to navigate the multifaceted challenges of curriculum transformation. Drawing on the lived experiences and reflections of law educators across diverse institutions, it provides a unique lens into how curriculum innovation can enhance teaching, learning and research in the legal academy. More than a commentary, this book is a call to action, a vital resource for educators, academic leaders and policymakers committed to ensuring the continued relevance, excellence and social responsiveness of legal education in the 21st century.

Economic and Political Consequences of AI: Managing Creative Destruction Günar, Altuğ, 2025-01-14. Firms that innovate on the production function by using unorthodox paths in technology are disrupting

routine actions and radically changing people's lives by innovating in a disruptive way while reinventing new ways. Schumpeterian innovations change the routine and traditional business conditions by realizing a new economic equilibrium and innovation in the production function. Today the use of artificial intelligence (AI) and AI-related applications and the expansion of their areas of use cause a Schumpeterian process of creative destruction, causing a destructive but at the same time creative cycle, such as the use of AI within existing technologies, the increase in the opportunities provided by the applications and the replacement of old and new technology. Therefore, today the widespread use of AI is one of the most significant technological advancements of recent times, encompassing a wide range of fields and significantly changing how economies and societies operate.

Economic and Political Consequences of AI: Managing Creative Destruction investigates the impact of AI on economics and politics. Although emerging AI and technologies scare societies and existing firms and companies, it is essential to research the existing uncertainty to eliminate uncertainties and reveal or discuss potential benefits and harms. Covering topics such as creative destruction, cyber politics, and the future of employment, this book is an excellent resource for computer developers, technology companies, businesses, professionals, researchers, policy makers, scholars, academicians, and more.

Innovating Assessment and Evaluation in Higher Education: Inclusive Practices and Technological Advancements Zaky, Hany, 2025-09-19. Assessment and evaluation are critical pillars in maintaining the quality and integrity of higher education, especially amid rapid technological, demographic, and structural shifts. As institutions strive to meet the needs of increasingly diverse student populations, there is a pressing need for inclusive, adaptable, and data-informed assessment practices. Innovative approaches to evaluation help ensure academic standards while supporting continuous improvement and equity across educational systems. Strengthening these practices not only enhances student learning outcomes but also informs institutional accountability and strategic decision-making. *Innovating Assessment and Evaluation in Higher Education: Inclusive Practices and Technological Advancements* addresses the growing need for robust, equitable, and innovative assessment practices that serve diverse student populations and institutional needs. It provides evidence-based strategies for designing and implementing effective assessment systems to sustain institutional academic growth. Covering topics such as academic integrity, mobile assessment, and portfolio assessment, this book is an excellent resource for higher education faculty and administrators, assessment coordinators, institutional researchers, educational developers, graduate students, educational consultants, and more.

Artificial Intelligence and International Arbitration Law Magdalena Łągiewska, 2025-11-21. The book asks whether the use of Artificial Intelligence (AI) and Generative AI (GenAI) in international arbitration represents a revolution or an evolution of the international dispute resolution landscape. Critically engaging with the transformative impact of the Fourth Industrial Revolution (4IR), this book focuses on the integration of AI and GenAI into international commercial arbitration. Set against the backdrop of rapid technological advancement, it explores how arbitral tribunals and stakeholders are cautiously yet progressively adopting these innovations in a manner that respects

and preserves the foundational principles of arbitration Through an interdisciplinary and practice oriented approach the book examines the evolving role of AI in arbitration It analyzes how AI is perceived and applied by parties arbitral institutions and arbitrators as well as assesses the legal frameworks in place to govern it Offering a balanced analysis of both the opportunities and legal and ethical dilemmas posed by emerging technologies the book asks if a duty of disclosure is relevant in relation to AI use and what challenges this might entail It also covers the status of AI generated arbitral awards under international law as well as copyright law This book will be of interest to researchers in the field of international arbitration and commercial law
