Deep Learning with PyTorch Lightning Kunal Sawarkar, 2022-04-29 Build, train, deploy, and scale deep learning models quickly and accurately, improving your productivity using the lightweight PyTorch Wrapper. Key Features: Become well-versed with PyTorch Lightning architecture and learn how it can be implemented in various industry domains. Speed up your research using PyTorch Lightning by creating new loss functions, networks, and architectures. Train and build new algorithms for massive data using distributed training. Book Description: PyTorch Lightning lets researchers build their own Deep Learning (DL) models without having to worry about the boilerplate. With the help of this book, you'll be able to maximize productivity for DL projects while ensuring full flexibility from model formulation through to implementation. You'll take a hands-on approach to implementing PyTorch Lightning models to get up to speed in no time. You'll start by learning how to configure PyTorch Lightning on a cloud platform, understand the architectural components, and explore how they are configured to build various industry solutions. Next, you'll build a network and application from scratch and see how you can expand it based on your specific needs beyond what the framework can provide. The book also demonstrates how to implement out-of-the-box capabilities to build and train Self-Supervised Learning, semi-supervised learning, and time series models using PyTorch Lightning. As you advance, you'll discover how generative adversarial networks (GANs) work. Finally, you

ll work with deployment ready applications focusing on faster performance and scaling model scoring on massive volumes of data and model debugging By the end of this PyTorch book you ll have developed the knowledge and skills necessary to build and deploy your own scalable DL applications using PyTorch Lightning What you will learnCustomize models that are built for different datasets model architectures and optimizersUnderstand how a variety of Deep Learning models from image recognition and time series to GANs semi supervised and self supervised models can be builtUse out of the box model architectures and pre trained models using transfer learningRun and tune DL models in a multi GPU environment using mixed mode precisionsExplore techniques for model scoring on massive workloadsDiscover troubleshooting techniques while debugging DL modelsWho this book is for This deep learning book is for citizen data scientists and expert data scientists transitioning from other frameworks to PyTorch Lightning This book will also be useful for deep learning researchers who are just getting started with coding for deep learning models using PyTorch Lightning Working knowledge of Python programming and an intermediate level understanding of statistics and deep learning fundamentals is expected Artificial Intelligence with Python Cookbook Ben Auffarth,2020-10-30 Work through practical recipes to learn how to solve complex machine learning and deep learning problems using Python Key FeaturesGet up and running with artificial intelligence in no time using hands on problem solving recipesExplore popular Python libraries and tools to build AI solutions for images text sounds and imagesImplement NLP reinforcement learning deep learning GANs Monte Carlo tree search and much moreBook Description Artificial intelligence AI plays an integral role in automating problem solving This involves predicting and classifying data and training agents to execute tasks successfully This book will teach you how to solve complex problems with the help of independent and insightful recipes ranging from the essentials to advanced methods that have just come out of research Artificial Intelligence with Python Cookbook starts by showing you how to set up your Python environment and taking you through the fundamentals of data exploration Moving ahead you ll be able to implement heuristic search techniques and genetic algorithms In addition to this you ll apply probabilistic models constraint optimization and reinforcement learning As you advance through the book you ll build deep learning models for text images video and audio and then delve into algorithmic bias style transfer music generation and AI use cases in the healthcare and insurance industries Throughout the book you ll learn about a variety of tools for problem solving and gain the knowledge needed to effectively approach complex problems By the end of this book on AI you will have the skills you need to write AI and machine learning algorithms test them and deploy them for production What you will learnImplement data preprocessing steps and optimize model hyperparametersDelve into representational learning with adversarial autoencodersUse active learning recommenders knowledge embedding and SAT solversGet to grips with probabilistic modeling with TensorFlow probabilityRun object detection text to speech conversion and text and music generationApply swarm algorithms multi agent systems and graph networksGo from proof of concept to production by deploying models as microservicesUnderstand how to

use modern AI in practice Who this book is for This AI machine learning book is for Python developers data scientists machine learning engineers and deep learning practitioners who want to learn how to build artificial intelligence solutions with easy to follow recipes You ll also find this book useful if you re looking for state of the art solutions to perform different machine learning tasks in various use cases Basic working knowledge of the Python programming language and machine learning concepts will help you to work with code effectively in this book *Practical Guide to Artificial Intelligence* Anabela Mesquita ,Maria João Castro ,Isabel Vieira,2025-09-25 Artificial Intelligence AI is becoming increasingly present in our lives transforming the way we work learn and interact with the world However many people remain unaware of the full potential of this technology and its effective use This book was created precisely to address this gap as it offers an accessible and practical guide to the main areas of application of Artificial Intelligence across different sectors of human activity Purpose of the Book The primary objective of this book is twofold first to introduce AI particularly Generative AI alongside the art of prompt creation enabling readers to maximize the benefits of these tools and second to map and present the most widely used AI applications highlighting their key features and practical applications Beyond that we also seek to raise awareness of AI s potential across different sectors and to encourage reflection on its impact particularly in terms of ethics and responsible use By bringing this information together in a single volume we aim to support a deeper understanding of AI and empower professionals educators and students to explore these technologies in a more informed and productive manner **Artificial Intelligence and Society 5.0** Vikas Khullar,Vrajesh Sharma,Mohit Angurala,Nipun Chhabra,2024-01-22 The artificial intelligence based framework algorithms and applications presented in this book take the perspective of Society 5 0 a social order supported by innovation in data information and knowledge It showcases current case studies of Society 5 0 in diverse areas such as healthcare smart cities and infrastructure Key Features Elaborates on the use of big data cyber physical systems robotics augmented virtual reality and cybersecurity as pillars for Society 5 0 Showcases the use of artificial intelligence architecture frameworks and distributed and federated learning structures in Society 5 0 Discusses speech recognition image classification robotic process automation natural language generation and decision support automation Elucidates the application of machine learning deep learning fuzzy based systems and natural language processing Includes case studies on the application of Society 5 0 aspects in educational medical infrastructure and smart cities The book is intended especially for graduate and postgraduate students and academic researchers in the fields of computer science and engineering electrical engineering and information technology *Mapping Legal Innovation* Antoine Masson,Gavin Robinson,2021-03-01 The legal sector is being hit by profound economic and technological changes digitalization open data blockchain artificial intelligence forcing law firms and legal departments to become ever more creative in order to demonstrate their added value To help lawyers meet this challenge this book draws on the perspectives of lawyers and creative specialists to analyze the concept and life cycle of legal innovations techniques and services whether related to
