Legal, Institutional, and Economic Indicators of Forest Conservation and Sustainable Management ,2005 This review looks at the Nation s legal institutional and economic capacity to promote forest conservation and sustainable resource management It focuses on 20 indicators of Criterion Seven of the so called Montreal Process and involves an extensive search and synthesis of information from a variety of sources It identifies ways to fill information gaps and improve the usefulness of several indicators It concludes that there is substantial information about the application of such capacities although that application is widely dispersed among agencies and private interests which in turn has led to differing interpretations of the indicators Individual chapters identify a need to further develop the conceptual foundation on which many of the indicators are predicated While many uncertainties in the type and accuracy of information are brought to light the review clearly indicates that legal institutional and economic capacities to promote sustainability are large and widely available in both the public and private sectors P vi *Air Force Magazine* ,2014-07
