Rosenbaum,2009-10-22 An observational study is an empiric investigation of effects caused by treatments when randomized experimentation is unethical or infeasible Observational studies are common

in most fields that study the effects of treatments on people including medicine economics epidemiology education psychology political science and sociology The quality and strength of evidence provided by an observational study is determined largely by its design Design of Observational Studies is both an introduction to statistical inference in observational studies and a detailed discussion of the principles that guide the design of observational studies Design of Observational Studies is divided into four parts Chapters 2 3 and 5 of Part I cover concisely in about one hundred pages many of the ideas discussed in Rosenbaum s Observational Studies also published by Springer but in a less technical fashion Part II discusses the practical aspects of using propensity scores and other tools to create a matched comparison that balances many covariates Part II includes a chapter on matching in R In Part III the concept of design sensitivity is used to appraise the relative ability of competing designs to distinguish treatment effects from biases due to unmeasured covariates Part IV discusses planning the analysis of an observational study with particular reference to Sir Ronald Fisher s striking advice for observational studies make your theories elaborate The second edition of his book Observational Studies was published by Springer in 2002

Research and Practical Issues of Enterprise Information Systems A Min Tjoa, Li Da Xu, Maria Raffai, Niina Maarit Novak, 2016-11-17 This book constitutes the proceedings of the 10th International IFIP WG 8.9 Working Conference on Research and Practical Issues of Enterprise Information Systems CONFENIS 2016 held in Vienna Austria in December 2016 The conference provided an international forum for the broader IFIP community to discuss the latest research findings in the area of EIS and specifically aimed at facilitating the exchange of ideas and advances on all aspects and developments of EIS The 25 papers presented in this volume were carefully reviewed and selected from 63 submissions They were organized in topical sections on semantic concepts and open data customer relationship management security and privacy issues advanced manufacturing and management aspects business intelligence and big data decision support in EIS and EIS practices
