Redefining the Citizen of the New Millennium Mohamed Diallo, 2017-09-08 Rising above expectations is one thing and moving on is another With great achievement comes great responsibility In a century where automation is rapidly taking place millions of people are losing their jobs and human effort is being replaced by computers and the stress level has dramatically increased It has caused many families to relocate because of the inability of the household to financially sustain itself Sadly human beings within the first two decades of the twenty first century have failed to act or rather implemented theories of past centuries inadequate to the current challenges of the world We have seen policies designed or actions taken that genuinely undermine the dignity of other human beings The truth is that despite all the technical and technological revolutions machines or computers will never have the human emotion That feeling of common humanity self respect and for others love for one another is something inherent and particular to the human nature We need to elevate our standards and uphold our core values more than ever We must refine our thinking and actions when the sanctuary becomes a ghost about to burn There is a need to redefine the citizen of the millennium This second volume aims to aid in preventing conflicts and resolving them when they arise It is designed to help each one of us find peace with ourselves and start a conversation with the other across the aisle It goes from the spiritual to the physical world the freedom to speak our minds grow from fear and turn challenges into opportunities for growth and inclusive progress
