Outlander and Lord John as Crime Fiction Erin E. MacDonald, 2025-01-24 Fans across the globe are familiar with Diana Gabaldon's bestselling Outlander series and the Starz television series that adapts it. Combining science fiction time travel and historical romance, the Outlander universe has captivated millions with its detail and complexity. However, few readers or viewers realize how large an influence the mystery genre has had on Gabaldon's plots, characters, and writing style. Her Lord John series of novels and short stories is obviously rooted in the crime fiction tradition, although it doesn't play by all of the traditional generic rules. Even the larger Outlander novels though contain at least one mystery in every book. This inclusion of the murder mystery and other crimes is no accident; the author has stated her love of the genre and her deliberate use of it many times. This collection of scholarly essays delves into the many connections between the world of Outlander and the world of crime fiction. It analyzes in depth for the first time the ways that crime and punishment, vigilante justice, and murder and mystery are represented in both the Outlander and Lord John series. Moving beyond the stereotypical romantic focus, this book demonstrates the variety and complexity of Gabaldon's universe. Artificial Intelligence in

Cultural Production Dal Yong Jin, 2021-05-26 This book offers an in-depth academic discourse on the convergence of AI, digital platforms, and popular culture in order to understand the ways in which the platform and cultural industries have reshaped and developed AI-driven algorithmic cultural production and consumption. At a time of fundamental change for the media and cultural industries driven by the emergence of big data algorithms and AI, the book examines how media ecology and popular culture are evolving to serve the needs of both media and cultural industries and consumers. The analysis documents global governments' rapid development of AI-relevant policies and identifies key policy issues; examines the ways in which cultural industries firms utilize AI and algorithms to advance the new forms of cultural production and distribution; investigates change in cultural consumption by analyzing the ways in which AI algorithms and digital platforms reshape people's consumption habits; and examines whether governments and corporations have advanced reliable public and corporate policies and ethical codes to secure socio-economic equality. Offering a unique perspective on this timely and vital issue, this book will be of interest to scholars and students in media studies, communication studies, anthropology, globalization studies, sociology, cultural studies, Asian studies, and science and technology studies.
