

ANDREW HUBERMAN'S MORNING ROUTINE

Wake up early

Waking up early, around 5:00 or 6:00 am helps you feel more energized and focused throughout the day.

Get exposure to natural light

This can help to regulate the body's internal clock and improve overall mood and energy levels.

Hydrate

Adding some lemon juice or apple cider vinegar to the water alkalizes the body and improves gut health.

Meditate

Practice for at least 10 minutes every morning to help reduce stress and improve mental clarity.

Stretch

Spend a few minutes stretching to improve flexibility, reduce muscle tension, and increase blood flow.

Exercise

Engage in some form of physical activity to help improve overall fitness and energy levels.

Fuel up with a healthy breakfast

A healthy breakfast (eggs, avocado, and whole-grain toast...) will provide sustained energy throughout the day.

Cold exposure

Taking a cold shower improves circulation, reduces inflammation, boosts metabolism, and guards your health against cold weather.

Journal

Journaling can help you improve self-awareness and mental clarity.

Set and review daily goals

Review your goals at the end of the day as a way to reflect on progress and identify areas for improvement.

The Feeling Economy Roland T. Rust, Ming-Hui Huang, 2021-01-19 As machines are trained to think many tasks that previously required human intelligence are becoming automated through artificial intelligence However it is more difficult to automate emotional intelligence and this is where the human worker's competitive advantage over machines currently lies This book explores the impact of AI on everyday life looking into workers adaptation to these changes the ways in which managers can change the nature of jobs in light of AI developments and the potential for humans and AI to continue working together The book argues that AI is rapidly assuming a larger share of thinking tasks leaving human intelligence to focus on feeling The result is the Feeling Economy in which both employees and consumers emphasize feeling to an unprecedented extent with thinking tasks largely delegated to AI The book shows both theoretical and empirical evidence that this shift is well underway Further it explores the effect of the Feeling Economy on our everyday lives in the areas such as shopping politics and education Specifically it argues that in this new economy through empathy and people skills women may gain an unprecedented degree of power and influence This book will appeal to readers across disciplines interested in understanding the impact of AI on business and our daily lives It represents a bold potentially controversial attempt to gauge the direction in which society is heading

The Brain, a Galaxy in Your Head David Fortin, 2025-08-29 The human brain is the most complex object known in the universe It is said that there are as many stars in the milky way as there are neurons in the brain Interestingly the parallel between the universe and the brain goes further as the matter density distribution in the universe would resemble that in the brain no less This book summarizes the current knowledge on the brain extending this knowledge into philosophical considerations It first retraces historical milestones in the discovery of the brain followed by a detailed and balanced account on current knowledge on the subject Admittedly the goal here is to summarize intelligibly the knowledge on the subject without going too much into

details The next step in this odyssey is then to consider more philosophical implications on the brain hence we will discuss one of the greatest mysteries of all the consciousness The last chapter will draw the line between the biological brain and AI which we will see have strictly nothing in common Finally we will study the impacts of digital technologies on our brains This is the perfect guide to familiarise yourself with the marvel within your head your brain
