Technologies in Idea Management Systems: A Model for Interoperability, Linking and Filtering , Idea Management Systems are web applications that implement the notion of open innovation though crowdsourcing Typically organizations use those kind of systems to connect to large communities in order to gather ideas for improvement of products or services Originating from simple suggestion boxes Idea Management Systems advanced beyond collecting ideas and aspire to be a knowledge management solution capable to select best ideas via collaborative as well as expert assessment methods In practice however the contemporary systems still face a number of problems usually related to information overflow and recognizing questionable quality of submissions with reasonable time and effort allocation This thesis focuses on idea assessment problem area and contributes a number of solutions that allow to filter compare and evaluate ideas submitted into an Idea Management System With respect to Idea Management System interoperability the thesis proposes theoretical model of Idea Life Cycle and formalizes it as the Gi2MO ontology which enables to go beyond the boundaries of a single system to compare and assess innovation in an organization wide or market wide context Furthermore based on the ontology the thesis builds a number of solutions for improving idea assessment via community opinion analysis MARL annotation of idea characteristics Gi2MO Types and study of idea relationships Gi2MO Links The main achievements of the thesis are

application of theoretical innovation models for practice of Idea Management to successfully recognize the differentiation between communities opinion metrics and their recognition as a new tool for idea assessment discovery of new relationship types between ideas and their impact on idea clustering Finally the thesis outcome is establishment of Gi2MO Project that serves as an incubator for Idea Management solutions and mature open source software alternatives for the widely available commercial suites From the academic point of view the project delivers resources to undertake experiments in the Idea Management Systems area and managed to become a forum that gathered a number of academic and industrial partners

Team Genius Rich Karlgaard, Michael S. Malone, 2015-07-07 A groundbreaking book that sheds new light on the vital importance of teams as the fundamental unit of organization and competition in the global economy Teams we depend on them for both our professional success and our personal happiness But isn't it odd how little scrutiny we give them The teams that make up our lives are created mostly by luck happenstance or circumstance but rarely by design In trivial matters say a bowling team the leadership of a neighborhood group or a holiday party committee success by serendipity is already risky enough But when it comes to actions by fast moving start ups major corporations nonprofit institutions and governments leaving things to chance can be downright dangerous Offering vivid reports of the latest scientific research compelling case studies and great storytelling Team Genius shows managers and executives that the planning design and management of great teams no longer have to be a black art It explores solutions to essential questions that could spell the difference between success and obsolescence Do you know how to reorganize your subpar teams to turn them into top performers Can you identify which of the top performing teams in your company are reaching the end of their life span Do you have the courage to shut them down Do you know how to create a replacement team that will be just as effective without losing time or damaging morale And most important are your teams the right size for the job Throughout Rich Karlgaard and Michael S Malone share insights and real life examples gleaned from their careers as journalists analysts investors and globetrotting entrepreneurs meeting successful teams and team leaders to reveal some new truths The right team size is usually one fewer person than what managers think they need The greatest question facing good teams is not how to succeed but how to die Good chemistry often makes for the least effective teams Cognitive diversity yields the highest performance gains but only if you understand what it is How to find the bliss point in team intimacy and become three times more productive How to identify destructive team members before they do harm Why small teams are 40 percent more likely to create a successful breakthrough than a solo genius is Why groups of 7 2 150 and 1 500 are magic sizes for teams Eye opening grounded and essential Team Genius is the next big idea to revolutionize business
