dieser erweiterten Sicht zeigt sich Risiko als ein vielschichtiger Ansatz der immer vor dem Hintergrund von menschlichen Entscheidungen unserer limitierten Rationalität und gesamtgesellschaftlichen Entwicklungen verstanden werden muss. Nur in diesem Gesamtkontext lassen sich konkrete Handlungsoptionen von wirtschaftlichen Akteuren anstelle von Visionen einer besseren Welt ableiten. Der heute in der Wirtschaft und bei Banken in der Regel verwendete Begriff von Risiko lautet vereinfacht: Schadenshöhe mal Wahrscheinlichkeit. Dabei werden eine Vielzahl von Annahmen impliziert, als gegeben vorausgesetzt: sich wiederholende Prozesse, eher kurzfristiger Zeithorizont von wenigen Tagen bis zu einem Jahr, Unabhängigkeit von verschiedenen Entscheidungsprozessen, Rationalität aller Beteiligten und weitgehend statische Rahmenbedingungen. Wenn es ein Gegenbeispiel bedürfte, dann hat sich dies mit der Herausforderung des Climate Change Risk und mit Betonung auf Change also eine Differenzbetrachtung ergeben: singuläre Situationen, sehr langfristige Perspektiven, verknüpfte wirtschaftliche Fragen, ideologisierte Positionen in der Gesellschaft und Tendenzen zur Bescheidung einer freien Marktwirtschaft zugunsten der Illusion staatlicher Planung.

Social Robots in Social Institutions Raul Hakli, Pekka Mäkelä, Johanna Seibt, 2023-01-15. Social institutions emerge from social practices which coordinate activities by the explicit statement of rules, goals and values. When artificial social actors are introduced into the physical and symbolic space of institutions, will this affect or transform institutional structures and practices, and how can social robotics as an interdisciplinary endeavor contribute to the ability of our institutions to perform their functions in society? This book presents the proceedings of Robophilosophy 2022, the 5th in the biennial Robophilosophy conference series held in Helsinki, Finland, from 16 to 19 August 2022. The theme of this edition of the conference was Social Robots in Social Institutions, and it featured international multidisciplinary research from the humanities and social sciences concerning social robotics. The 63 papers, 41 workshop papers and 5 posters included in this book are divided into 4 sections: plenaries, sessions, workshops and posters. With the 41 papers in the Sessions section grouped into 13 subdivisions including elderly care, healthcare, law, education and art, as well as ethics and religion. These papers explore the anticipated conceptual and practical changes which will come about from the introduction of social robotics into public and private institutions such as public services, legal systems, social and healthcare services or educational institutions. Offering an exploration of the societal significance of social robots for the future of social institutions, the book will be of interest to both researchers in robotics and to those working in social institutions and enterprises.
