Malone,2023-01-11 Since the turn of the millennium it has become clear that the Asia Pacific Region is economically the fastest growing continent in the world and is likely to remain so for some time despite the setbacks of the COVID 19 pandemic Asia Pacific s share of the world s Gross Domestic Product GDP doubled from 15 per cent to 30 per cent between 1970 and 2017 and is projected to account for half of global GDP by 2050 With South East and South Asia also growing rapidly with over half the world s population and three of the world s five largest economies Asia is soon poised to home half of the world s middle class a class that is both the driver and the product of higher education The quality of a country s system of higher education may be seen both as a gauge of its current level of national development as well as of its future economic prospects It is therefore natural that the putative Asian Century should generate interest in the region s higher education systems which on the one hand share common characteristics a fixation with credentials and engineering high technology especially among

male students and business degrees while at the same time are also highly differentiated not only across countries but also within Asia. Such a better understanding of higher education achievements, failings, potential, and structural limitations in the Asia Pacific Region is imperative. This handbook presents a number of significant country case studies and documents cross-cutting trends relating to, among other things, the trilemma faced by governments juggling competing claims of access, accessible cost and quality, the balance between teaching and research, the links between labour markets demand and higher education supply, preferred fields of study and their consequences, the rise of the research university in Asia, the lure of institutions of international reputation within the region, new education technologies and their effects, and trends in government policy within the wider region and sub regions.

The Book of Isaias Daniel Connolly, 2016-10-04 FIRST PLACE for the Best Political Current Affairs Book International Latino Book Awards 2017 One of Southern Living's Best Books of 2016 OFFICIAL SELECTION 2017 Social Justice Book List published by The National Network of State Teachers of the Year NNSTOY Boston Public Library Latino Life Booklist Chicago Public Library Hispanic Heritage Month Booklist Books for Welcoming Week by King County Library System Washington State A fast paced nonfiction narrative that will help you understand today's immigration battles. 18 year old high school senior Isaias Ramos plays in a punk rock group called Los Psychosis and likes to sing along to songs by Björk and her old band the Sugarcubes. He's so bright that when his school's quiz bowl goes on local TV he acts as captain. The counselors at school want him to apply to Harvard. But Isaias isn't so sure. He's thinking about going to work painting houses with his parents who crossed the Arizona desert illegally from Mexico. Despite the obstacles and his own doubts Isaias sets out on the journey to become the first in his family to go to college. He faces make or break standardized testing, immigration bureaucracy and absurdly high college costs. And most importantly the siren song of doubt. This simple story reflects broader truths. Mexican immigration has brought the proportion of Hispanics in the nation's youth population to roughly one in four. Every day children of immigrants make decisions about their lives that will shape our society and economy for generations. In the tradition of *Friday Night Lights* and *A Hope in the Unseen* this deeply human narrative offers a powerful antidote to the

heated political rhetoric about immigrants and their children
