Sold People Johanna S. Ransmeier,2017-03-20 Trade in human lives thrived in North China during the Qing and Republican periods Families at all social levels participated in buying servants slaves concubines or children and disposing of unwanted household members Johanna Ransmeier shows that these commonplace transactions built and restructured families as often as it broke them apart **Chinese Village Life Today** Gonalo Santos,2021-08-22 An intimate look at twenty first century households in rural China China has undergone a remarkable process of urbanization but a significant portion of its citizens still live in rural villages To gain better access to jobs health care and consumer goods villagers often travel or migrate to cities and that cyclical transit and engagement with new technoscientific and medical practices is transforming village life In this thoughtful ethnography Gon alo Santos paints a richly detailed portrait of one rural township in Guangdong Province north of the industrialized Pearl River Delta region Unlike previous studies of rural urban relations and migration in China Chinese Village Life Today based on Santos's more than twenty years of field research starts from a rural community's point of view rather than the perspective of major urban centers Santos considers the intimate choices of village families in the face of larger forces of modernization showing how these negotiations shape the configuration of daily village life from marriage childbirth and childcare to personal hygiene and public sanitation Santos also outlines the

advantages of a rural existence including a degree of autonomy over family planning and community life that is rare in urban China Filled with vivid anecdotes and keen observations this book presents a fresh perspective on China's urban rural divide and a grounded theoretical approach to rural transformation *The Cold War 1949-2016* Martin McCauley, 2017-05-18

Traveling in China today and walking about in various cities it is easy to observe the continued unbridled construction of huge megalithic high rise complexes in vast stretches of the country complete with the untrammelled despoiling of nature and intensification of pollution as well as the ever increasing vibrancy of the Chinese people glued to their cell phones and actively connected online always moving about and hustling for yet another deal At the same time using the internet without a VPN and talking to academics at various universities it becomes obvious that there is a massive increase in repressive measures by the state the tightening of the intellectual control of both content and expression the fluctuating inaccessibility of information sources that used to be perfectly fine What the question arises is going on here Where China stands today and where is it headed from here And what in all of this is the role and place of Daoism These sixty vignettes on Daoist China present different aspects of life in China in each case describing the current situation and connecting it to the role and changing facets of Daoism today focusing in turn on dimensions of governance economics and culture [Fetal Positions](#) Amy Adamczyk, 2025

In many countries abortion is a contentious public opinion issue In nations like the United States advocates on both sides of the debate have actively worked to amplify their voices and change legislation In other parts of the world such as China abortion is not a major discussion topic because many residents may see it as a relatively settled issue Legal developments often move in accordance with changes in public opinion but not always What explains differences in public opinion about abortion around the globe *Fetal Positions* explores this question using large scale surveys from most of the world's population interviews with experts from two case study countries the US

and China and an analysis of newspaper articles from over forty countries The book examines the factors influencing cross national abortion rates and individual abortion decisions investigates the relationship between attitudes and laws and explores how personal and national characteristics shape views on abortion In *Fetal Positions* Amy Adamczyk makes the case that abortion disapproval is not randomly distributed across the world In fact patterns can be found across nations Adamczyk shows that cross national differences in public opinion can largely be explained based on a handful of factors overall levels of religious belief Catholic proportion economic and educational development type of government and government history and gender inequality Latin America for example is dominated by Catholicism has high levels of religious belief and low levels of abortion support Conversely while France and Spain have strong historical connections to the Catholic Church the proportion who feel that religion is highly important is much lower and attitudes are more liberal By offering important insights that can only be gleaned through cross national analysis *Fetal Positions* provides an international focus and fresh perspective on the abortion debate

Self-Identity Narratives of Chinese Students in the United States Sarah Y. Köksal, 2023-01-31 While previous research has explored the academic adaptation or acculturation processes of Chinese students studying abroad limited attention has been paid to students own perspectives and narrations of their experience To contribute to a more nuanced understanding of this highly mobile group this study takes a closer look at the students self identity narratives How do they make sense of their foreign adventure How do they position themselves among their peers and their family members as well as within the greater transnational context Based on 29 in depth biographical interviews with Chinese students in the United States the findings show the participants continuously interpreting and revising their individual academic and cultural identities In the familial context a recurring narrative of the high potential only child could be observed Many students and their family members felt that their unique talents and personalities were not appreciated within the Chinese educational system and thus sought more holistic environments abroad

Leftover in China Roseann Lake,2018-02-13 Factory Girls meets The Vagina Monologues in this fascinating narrative on China s single women and why they could be the source of its economic future Forty years ago China enacted the one child policy only recently relaxed Among many other unintended consequences it resulted in both an enormous gender imbalance with a predicted twenty million more men than women of marriage age by 2020 and China s first generations of only daughters Given the resources normally reserved for boys these girls were pushed to study excel in college and succeed in careers as if they were sons Now living in an economic powerhouse enough of these women have decided to postpone marriage or not marry at all to spawn a label leftovers Unprecedentedly well educated and goal oriented they struggle to find partners in a society where gender roles have not evolved as vigorously as society itself and where new professional opportunities have made women less willing to compromise their careers or concede to marriage for the sake of being wed Further complicating their search for a mate the vast majority of China s single men reside in and are tied to the rural areas where they were raised This makes them geographically economically and educationally incompatible with city dwelling leftovers who also face difficulty in partnering with urban men given the urban men s general preference for more dutiful domesticated wives Part critique of China s paternalistic ideals part playful portrait of the romantic travails of China s trailblazing women and their well meaning parents who are anxious to see their daughters snuggled into traditional wedlock Roseann Lake s Leftover in China focuses on the lives of four individual women against a backdrop of colorful anecdotes hundreds of interviews and rigorous historical and demographic research to show how these leftovers are the linchpin to China s future
