NAMED ONE OF THE BEST COOKBOOKS OF THE YEAR BY GARDEN OF Eatin'. I felt like I was there on the journey with Jennifer Lapidus herself as I read her beautifully written book. Peter Reinhart, author of *The Bread Baker's Apprentice*. At Carolina Ground flour mill in Asheville, North Carolina, Jennifer Lapidus is transforming bakery offerings across the southern United States with intensely flavorful flour made from grains grown and cold stone milled in the heart of the South. While delivering extraordinary taste, texture, and story, cold stone milled flour also allows bakers to move away from industrial commodity flours to create sustainable and artisanal products. In *Southern Ground*, Lapidus celebrates the incredible work of craft bakers from all over the South. With detailed profiles on top Southern bakers and more than seventy-five highly curated recipes arranged by grain, *Southern Ground* harnesses the wisdom and knowledge that the baking community has gained. Lapidus showcases superior cold stone milled flour and highlights the importance of baking with locally farmed ingredients while providing instruction and insight into how to use and enjoy these geographically distinct, flavor-forward flours. *Southern Ground* is a love letter to Southern baking and a call for the home baker to understand the source and makeup of the most important of ingredients: flour.

Agroecosystems Facing Global Climate Change: The Search for Sustainability José M. Mirás-Avalos, Philippe C. Baveye, 2019-02-05 Global change is posing new threats to agroecosystems. First, climate modifications in the spatial and temporal distribution of rainfall increase the risks of severe droughts during the growing season of most crops. Second, conventional agriculture has led to the extension of mono-crop fields that decreased biodiversity in agroecosystems; it is possible that these fields will lack resilience when faced with changing climate. In addition, a new conscience has arisen, and consumers tend to look for healthy products that sometimes do not match the objectives of conventional agriculture. In this context, sustainable and environmentally friendly agricultural practices that can cope with the new global change scenario are needed. This eBook compiles state-of-the-art research on the agroecosystems' response to global change and on how to manage these new scenarios. Despite the broad scope of the topic, this Research Topic covers a wide range of subjects, including biodiversity, crop performance, novel agricultural practices, and soil properties.
